

Simplified Peanut Product Distribution Pattern From Peanut Corporation of America (PCA) to Point of Sale

This chart illustrates some of the many paths a peanut product produced by the Peanut Corporation of America (PCA) might have taken before reaching the consumer. From the time a product left PCA it could pass through multiple points, sometimes being processed into new, widely distributed food products for consumers and pets. Actual distribution patterns may be more extensive and complex than what is illustrated here.

The length of the distribution chain, the number of finished products the peanut material is incorporated into, and the breadth of the distribution chain are all factors contributing to the length of time it takes to conduct a recall.

PCA shipped peanut products to hundreds of establishments, including numerous distributors and manufacturers. As of February 9, 2009, over 1,800 products have been recalled and more than 250 brands affected.

The circled numbers (1,2,3,4, etc.) represent products that were made using at least one ingredient originating from PCA's peanut processing facility in Blakely, Georgia.
