This document lists observations made by the FDA representative(s) during the inspection of your facility. They are inspectional observations, and do not represent a final Agency determination regarding your compliance. If you have an objection regarding an observation, or have implemented, or plan to implement, corrective action in response to an observation, you may discuss the objection or action with the FDA representative(s) during the inspection or submit this information to FDA at the address above. If you have any questions, please contact FDA at the phone number and address above.

DURING AN INSPECTION OF YOUR FIRM I OBSERVED:

OBSERVATION 1

Effective measures are not being taken to exclude pests from the processing areas and protect against the contamination of food on the premises by pests.

Specifically, a roll type door located in the raw peanut receiving area had a 1" opening along the bottom of the door.

In addition, one fly was observed in the roaster room on 8/20/07. One fly was observed in the packing line area on 8/20/07. One fly was observed in the raw peanut receipt area on 8/20/07 and 8/21/07.

OBSERVATION 2

Failure to store cleaned and sanitized portable equipment in a location and manner which protects food-contact surfaces from contamination.

Specifically, dismantled equipment used on the filling/production line (not in use) was stored on a thin piece of cardboard on the floor of packaging area. This equipment was tagged as "cleaned."

OBSERVATION 3

Failure to provide safety-type lighting fixtures suspended over exposed food.

Specifically, a light fixture missing the protective covering was observed on the 2nd floor area, directly in front of the ingredient storage room.
