Reporting Changes For 2001 HMDA Files

Introduction

The HMDA file specifications were amended August 13, 2001 to comply with an agreement to transfer the Office of Thrift Supervision (OTS) data collection process to the Board of Governors of the Federal Reserve System (Board). The change is effective with the CY 2001 data due on March 1, 2002.

File Specifications For 2001 HMDA Data

Introduction

The following information describes the format used when sending automated HMDA data to the Board of Governors of the Federal Reserve System. These formats should only be used to send data to the Board if you are an FDIC, NCUA, OCC or OTS reporter.

General Information For PC Diskette, CD-ROM and Cartridge Tape

All records are 314 characters and contain the following:

- The Transmittal Sheet has 16 elements comprising 207 characters and filler comprising 107 characters of blanks.
- The Loan/Application Register has 26 elements comprising 103 characters and filler comprising 211 characters of blanks.

PC Diskette and CD-ROM Format Information

PC Diskette and CD-ROM Format Characteristics

HMDA data submitted via diskette or CD-ROM must adhere to the following specifications:

1. The diskette or CD-ROM must be formatted for IBM compatible personal computers. The following diskette and CD-ROM formats will be accepted:
 - Diskette - 3-1/2 high density, 1.44M formatted capacity
 - CD-ROM - CD-R or equivalent recordable compact disc
2. The HMDA data should be contained in a file named: HMDA.DAT
 - The file must be the only file on the diskette or CD-ROM.
 - The file may contain HMDA records for multiple respondents that must be sorted in Respondent-ID, Record Type order.
 - An institution's entire HMDA file must be placed on one diskette unless it is too large and requires additional diskettes. Therefore, if there are other departments or branches collecting HMDA data for a specific institution, the entire report should be combined into one submission prior to mailing it. If additional diskettes are required because the file is too large, it must be split into multiple files (each named HMDA.DAT) using separate diskettes. The HMDA Transmittal Sheet should only be included on the first diskette.
3. The HMDA data file must be in ASCII format, containing carriage return/line feed (OD0A in HEX) characters at the end of each record. There should not be an end-of-file mark on the file.
4. The record format is fixed; the fields contained in the record must not be delimited. In addition, the record must not be enclosed in quotes.
5. Numeric fields on HMDA records must be right justified and zero filled. If you are using a product that drops the leading zeros on numeric fields, the data will not pass validity edits.
6. The PC diskette(s) or CD-ROM should be labeled with information containing the Reporter's name, identification number, agency code, processing year, contact name, phone number, number of diskettes (e.g., 1 of 3), number of LAR records, and any other pertinent information.
7. All diskettes submitted should be virus-free.
8. The diskette and CD-ROM will contain two types of records:
 - 1 = Transmittal Sheet
 - 2 = LAR Register Data
9. No zip file(s) will be accepted.
10. There should not be any null values (00 in HEX or ASCII char (0)) contained in the file.

Cartridge Tape Format Information

Cartridge Tape Format Characteristics

HMDA data submitted via Cartridge Tape must adhere to the following specifications:

1. Tape Label: All Tapes MUST be non-labeled
2. Record Format: Fixed Block
3. Blocksize: 24,178
4. Record Length: 314
5. File Organization: Physical Sequential
6. Tape Density: 3480, 3490, or 3490E IBM Compatible Cartridges - non-compressed.
(No other type will be accepted.)
7. Data Format: EBCDIC
8. The tape must contain three types of records:
 - 0 = File Identifier
 - 1 = Transmittal Sheet
 - 2 = LAR Register Data
9. End of file marker should be included
10. A tape should be accompanied with a document containing the respondent's name, identification number and agency code, record length, block size, contact name, phone number, number of LAR records, and any other pertinent information.
11. An institution's entire HMDA file must be placed on one cartridge unless it is too large and requires additional cartridges. Therefore, if there are other departments or branches collecting HMDA data for a specific institution, the entire report should be combined into one submission prior to mailing it. If additional cartridges are required because the file is too large, the file identifier and transmittal sheet should be included on all the cartridges.
12. There should not be any null values (00 in HEX or ASCII char (0)) contained in the file.

File Identifier

(INCLUDE THE FILE IDENTIFIER WITH CARTRIDGE TAPE SUBMISSIONS ONLY)

The Start, End, and Length columns are in BYTES. The Data Type should be alphanumeric "AN" or numeric "N". Numeric "N" fields are unpacked, unsigned, and right justified.

Element Label	Start	End	Length	Data Type	Comments, Values, Keys, etc.
01. Record ID	1	1	1	N	Value is 0
