Search ongoing or recently completed summaries of DOE R&D projects

Find information on research projects performed by DOE laboratories and supported at universities and other research facilities

DOE R&D Project Summaries

Database Features

- Includes projects from a wide array of energy-related science disciplines
- Offers easy and advanced search options
- Provides a single source for information on current R&D projects within DOE
- Provides a tool for both DOE researchers and program managers to share R&D results with all interested parties
- Provides public access to information on DOE's research capabilities and activities
- Supports advanced searching on 15 database fields, e.g., principal investigator, contract number, sponsor, fiscal year, project description and more

Database Comments, Questions, and Feedback should be sent to: rndsummaries@osti.gov
