FEDERAL INCOME TAX BENEFITS FOR ADOPTION: USE BY TAXPAYERS, 1999 – 2005

The document provides information about the use of federal tax benefits for adoption annually for tax years 1999 through 2005. The first section summarizes the provisions of the two federal income tax benefits for adoptions. The second section describes the data sources, relevant limitations, and certain assumptions used in the tables that follow.

TAX BENEFITS FOR ADOPTION

Since 1997, the federal individual income tax has included two provisions that provide financial assistance to families adopting children, a tax credit for adoption expenses and an exclusion for employer-paid benefits. Both programs provide tax benefits for adoptions of children with special needs and adoptions of other children, but adoptions of a spouse's child (i.e., stepchild adoptions) are not eligible. The provisions were enacted in the Small Business Job Protection Act of 1996. The Economic Growth and Tax Relief Reconciliation Act of 2001 (EGTRRA) generally liberalized both provisions and extended the portions that were due to expire after 2001. Most of the EGTRRA changes were effective for 2002, but additional benefits for adoptions of children with special needs and annual indexing of benefit limits were effective for 2003.

Tax benefits are available under each of the provisions for a limited amount of qualified adoption expenses per adoption, whether paid or incurred in one year or over several years. The limit has varied in different years and has been higher or more liberally applied for adoptions of children with special needs. The same expenses cannot qualify for tax benefits under both programs; however, a taxpayer may use the benefits of the exclusion and the tax credit for different expenditures. Under both programs, benefits are phased out for higher-income taxpayers.

Tax Credit

A taxpayer may receive a tax credit of 100 percent of qualified adoption expenses, up to a limit, paid in connection with an adoption.¹ The adoption tax credit is not refundable. Qualified expenses do not include expenses covered by employer reimbursements, whether those reimbursements are excludable or taxable. Taxpayers may take the credit for qualified expenses in more than one year, so long as the total does not exceed the appropriate limit per adoption. The amount of the tax credit otherwise allowable is phased out ratably for higher income taxpayers. Unused tax credits may be carried forward and used during the five subsequent years.

Exclusion for Employer-Paid or Employer-Reimbursed Benefits

¹ The per adoption limit is cumulative for all years for a particular adoption and is the maximum amount that may be taken into account in connection with the taxpayer's effort to adopt an eligible child, including qualified expenses paid in any unsuccessful attempt to adopt an eligible child.

Employer payments or reimbursements for qualified adoption expenses paid under a non-discriminatory employer plan are excludable from the employee's income.^{2,3} The amount of the excluded employer payments is subject to a per adoption limit. Employer payments for an adoption may be excluded in more than one year, but the total exclusion for a single adoption may not exceed the maximum allowable per adoption. The exclusion is phased out generally over the same income range as the adoption tax credit except that, for purposes of determining the phaseout of the employer exclusion, modified adjusted gross income includes all employer payments or reimbursements for adoption expenses, whether or not they are taxable to the employee.

Common Provisions of the Tax Credit and Employer Exclusion

Eligible Children. An eligible child is an individual who has not attained age 18 or who is physically or mentally incapable of caring for himself or herself. An eligible child may not be the child of the taxpayer's spouse.

Qualified expenses. Qualified adoption expenses are reasonable and necessary adoption fees, court costs, attorneys' fees, and other expenses that are directly related to, and the principal purpose of which is for, the legal adoption of an eligible child. All reasonable and necessary expenses required by a State as a condition of adoption are qualified adoption expenses. For example, expenses may include the cost of construction, renovations, alterations or purchases specifically required by the State to meet the needs of the child. Eligible expenses do not include expenses (1) for which a deduction or credit is allowed under any other provision of the Internal Revenue Code, (2) to the extent the funds for the expenses are received under any Federal, State, or local program, (3) incurred in violation of State or Federal law, (4) incurred in carrying out any surrogate parenting arrangement, (5) incurred in connection with the adoption of a child of the taxpayer's spouse, (6) for purposes of the tax credit, that are reimbursed under an employer adoption assistance program, (7) that are reimbursed under other payment or reimbursement program. In addition, expenses paid or reimbursements received prior to January 1, 1997 are not eligible for the tax credit or the exclusion for employer benefits. The denial of a double benefit for the same expenditure does not prevent the taxpayer from obtaining benefits under different tax or expenditure programs for different qualified adoption expenses.

Maximum Eligible Qualified Expenses. For 1999 through 2001, the maximum amount of expenses per adoption eligible under each program was \$6,000 for the adoption of a child with special needs and \$5,000 other adoptions. Beginning in 2002, the maximum increased to \$10,000 per adoption, for both special needs and non-special needs adoptions. Beginning in 2003, the \$10,000 amount was indexed annually to reflect inflation. Also, beginning in 2003, under both programs, adoptions of children with special needs were eligible for the maximum

² Employer benefits that are excludable for income tax purposes are still subject to Social Security and Medicare taxes.

³ Employer-paid or -reimbursed benefits include those paid under salary reduction plans which do not represent an additional payment by the employer.

amount even if actual qualified expenses were less. Eligibility for the difference between the maximum amount and actual expenses occurred when the adoption was finalized.

Maximum Adoption Benefits, 1999 - 2005

	1999 to 2001	2002	2003	2004	2005
Maximum Tax Credit per Adoption and Maximum Employer Exclusion per Adoption					
Adoptions other than Special Needs	\$5,000	\$10,000	\$10,160	\$10,390	\$10,630
Special Needs Adoptions	\$6,000	\$10,000	\$10,160	\$10,390	\$10,630

Income limits and phaseouts. The adoption tax benefits otherwise calculated are reduced or eliminated over a \$40,000 modified adjusted gross income (AGI) range which began at modified adjusted gross income of \$75,000 before 2002, at \$150,000 in 2002, and at \$150,000 indexed for inflation in 2003 and later years. For purposes of calculating the income phaseout, modified AGI is computed by increasing the taxpayer's AGI by the amount otherwise excluded from gross income under Internal Revenue Code sections 911, 931, or 933 (relating to the exclusion of income of U.S. citizens or residents living abroad; residents of Guam, American Samoa, and the Northern Mariana Islands, and residents of Puerto Rico, respectively). In addition, for purposes of the exclusion for employer adoption benefits, modified AGI is determined without applying the exclusion for such benefits.

Phaseout Ranges for Adoption Benefits, 1999 - 2005

	1999 to 2001	2002	2003	2004	2005
Income Related Phaseout of Benefits					
Phaseout Begins (modified AGI)	\$75,000	\$150,000	\$152,390	\$155,860	\$159,450
Fully Phased Out (modified AGI)	\$115,000	\$190,000	\$192,390	\$195,860	\$199,450

Timing of tax benefits. The year in which a taxpayer's qualified adoption expenses are considered for the tax credit and the year in which employer payments or reimbursements are excluded from the employee's income depends on the year in which the adoption becomes finalized and whether the expenses are for the adoption of a non-foreign or a foreign child.

Adoption of a non-foreign child. A non-foreign child is one who is a citizen or resident of the United States at the time the adoption effort is commenced. The credit for qualified adoption expenses paid or incurred (including such amounts paid or incurred in an unsuccessful effort to adopt such a child) is generally allowed in the next taxable year. However, the credit for expenses paid or incurred in or after the taxable year an adoption becomes final is allowed in the year that they are paid or incurred. Employer payments or reimbursements are excluded from the employee's income in the year in which the payments or reimbursements are made.

Adoption of a foreign child. Special rules apply for the adoption of an eligible child who is not a citizen or resident of the United States at the time the adoption effort commenced. Qualified adoption expenses for purposes of the tax credit and employer payments or reimbursements are treated as if they are paid in the year in which the adoption becomes final. Thus, employer payments or reimbursements made in a prior year are taxable income to the employee in the year in which made, but then are deducted from the employee's income in the year in which the adoption becomes final. For expenses paid or incurred after the taxable year an adoption becomes final, a tax credit or exclusion from income is allowed in the year in which the payments or reimbursements are made.

Adoption of a child with special needs. Special benefits in connection with the adoption of a child with special needs are available only when a State has made a determination that the adoptee is a child with special needs. A child with special needs is a child who the State has determined: (1) cannot or should not be returned to the home of the birth parents, and (2) has a specific factor or condition because of which it is reasonable to conclude that the child cannot be placed with adoptive parents without adoption assistance. Examples of such factors or conditions are the child's ethnic background, age, membership in a minority group, being one of a group of siblings awaiting adoption together, medical condition, or physical, mental, or emotional handicap. Children who are not citizens or permanent residents of the United States are ineligible for special needs classification.

DATA SOURCES AND LIMITATIONS

Data Sources

The data underlying the adoption tax benefit tables are from all individual income tax returns (Forms 1040 and 1040A) on which any adoption tax benefit, either from the adoption tax credit or the employer exclusion for adoption expenses, was reported or which included a Form 8839 (Qualified Adoption Expenses). The data are as reported by the taxpayers and, thus, reflect any errors, omissions, or internal inconsistencies reported on the tax returns as well as any transcription errors that may have been made when paper returns were transcribed by the IRS. The data do not reflect any corrections that may have been made by the IRS during processing, any examinations (audits) of the tax returns, or any changes by taxpayers through the subsequent filing of amended tax return. Information about such changes is not available.

The tax return data upon which these tables are based were extracted from income tax returns for IRS administrative requirements, and certain items reported on the tax returns were not extracted or transcribed. In some cases, the missing items can be calculated from included items. However, in other cases, the information cannot be inferred from included items. For example, for 2005 tax returns, the IRS did not extract or transcribe information indicating that the adoption was for a foreign child or a child with special needs. These categories cannot be determined from other included items.

Data Processing

During preparation of the tables, the data were checked for many types of inconsistencies and errors. Adjustments were made to fewer than 2 percent of tax returns to correct for obvious errors, and a very small number of tax returns (a total of 10 returns for the entire seven year period) with significant, unresolved data inconsistencies were omitted from the tabulations. Where there were inconsistencies between items on Form 8839 and Form 1040, the data from the Form 1040 were used.

The year of birth entry for the adoptee was frequently clearly incorrect. Where the intended year of birth seemed clear (e.g., 1099 for 1999), the data were corrected. Where the intended year of birth was not clear, the age of the child was recorded as "Age Not Specified" as were children for whom no birth year was reported. The category "10 Years and over" should be interpreted with care. Some taxpayers appear to have reported their own birth year rather than the child's. However, since special needs adoptions are not limited to children under age 18, no adjustment was made to these birth years. The reported age was treated independently for each year even when the same child appeared in data for more than one year.

At least three types of relatively frequent inconsistencies or errors in the data were noted during processing: (a) some returns appear to claim tax credits for non-special needs adoptions larger than their reported qualified expenses (b) some returns in higher income groups do not appear to be adjusted correctly for the income-related phaseout, and (c) some adoption tax credits carried forward from prior years do not seem to be associated with prior returns on which the credit was initially developed. We do not have sufficient information to determine if these inconsistencies are due to taxpayer errors or problems in the data. These inconsistencies do not have a significant impact on the tables.

Preventing Disclosure of Tax Return Information

The tables have been reviewed and adjusted to prevent possible disclosures of information from any tax return, as mandated by Internal Revenue Code section 6103. In some instances, data from adjacent cells were combined to avoid improper disclosure. Also, median values have been masked by being rounded to the nearest \$10. Finally, in the state tables, where information in a particular column could not be shown separately, that information was included in the "State Not Identified" category.

Footnotes follow Table 2005-3

Source: Tabulations of data from individual income tax returns reporting the tax credit for adoption or reporting current-year qualified adoption expenses.

NOTES TO THE TABLES

- Details may not add totals due to rounding.
 - Excludes a small number of tax returns with significant, unresolved data inconsistencies.
 - The income classes above \$75,000 for 1999 through 2001 and above \$150,000 (or \$150,000 indexed for inflation) beginning for 2002 represent income ranges at which benefits are either partially or fully phased out. The phaseout range was increased statutorily beginning for 2002. Beginning for 2003, the beginning and end (but not the width) of the phaseout range are adjusted annually for inflation.
- 1/ Number of tax returns reporting qualified adoption expenses in current year. Excludes tax returns reporting only adoption credits carried forward from prior year. Returns reporting only credits carried forward are included in the carry forward information.
- 2/ Total tax benefits are the sum of the tax credits allowable in the current year and the tax value of the employer exclusion.
- 3// Tax credit from current year expenses is the tax credit generated from qualified expenses reported on the current-year return as reduced by the income-related phaseout, if applicable.
- 4/ Tax credits allowable in the current year are the credits that actually reduce tax liability in the current year. Such credits may be attributable to qualified expenses reported on the current-year tax returns and unused credits carried forward from prior years, or both. Means and medians are calculated for those with positive values for tax credits.
- 5/ The tax credit carried forward to future years or expiring is the difference between total tax credits available for the current year (tax credit generated in the current year plus any credits carried forward from prior years) less tax credit allowable in the current year. The numbers shown may overstate the credits available in future years because they do not exclude unused credits carried forward from prior years that expire in the current year.
- 6/ The total of the tax benefits from employer exclusions reported for the current year. Tax benefit is calculated as the nontaxable portion of the exclusion multiplied by the marginal tax rate on the first dollar of the excluded amount. Means and medians are reported only for those with positive exclusion values.
- 7/ Number of adoptions is the total number of children for whom qualified adoption expenses were reported on the current-year tax return. This excludes children for whom only adoption credit carried forward from prior years is reported. Because qualified adoption expenses for an adoptee can be reported in more than one year, summing the number of adoptees across years will overstate the number of children for whom qualified adoption expenses were incurred.

NOTES TO THE TABLES - continued

- 8/ The number of children in each age category for whom adoption expenses were reported in the current-year tax return. This excludes children for whom only adoption credit carried forward from prior years is reported. The age of each adoptee is calculated from the year of birth.
- 9/ The number of returns with multiple adoptions is the number of returns reporting qualified adoption expenses in the current year for two or more children. Families reporting qualified adoption expenses or carried forward credits for more than two children are required to file multiple Forms 8839. However, the data available for this compilation include only the first Form 8839 and an indicator for additional forms. Such returns were tabulated as reporting only two adoptions. In each year, there were 12 or fewer such returns.
- 10/ Total qualified adoption expenses reported for the current year do not include expenses reported in prior years. This total is the sum of qualified expenses reported for the tax credit and the employer exclusion, both excludable and non-excludable portions of employer benefits. The total includes expenses in excess of the amounts for which tax benefits are available only to the extent that they were reported on tax returns. Means and medians are calculated for those with positive values of qualified adoption expenses.
- 11/ Foreign adoptees may not be categorized as children with special needs. Foreign adoptees with special needs are categorized as foreign adoptees.
- 12/ Total income is income before deduction of "adjustments to income." Total income is equivalent to adjusted gross income (AGI) plus statutory adjustments.
- 13/ This category includes tax returns of military personnel with APO and FPO addresses.
- 14/ This category includes combined information for Puerto Rico, U.S. Virgin Island, other U.S. protectorates, and returns with unknown addresses. Certain columns also include information for states that cannot be shown separately to avoid disclosure of information about individual taxpayers. Since data included in the State Not Identified row to avoid disclosure are not consistent across columns, any percentages calculated for the State Not Identified row would not be meaningful.
