Data Validation (DV) State Web Software Release 2.1.0
RELEASE NOTES

SUMMARY

The Data Validation (DV) State Web Software Release 2.1.0 has been installed on your system. This release contains Bug Fixes to the existing web-based DV application.

Use 'Internet Explorer' browser for best performance.

1. Known Issues

DVWS2-0-0 Benefits Bug Fixes	
Problem	**Fix**
Benefits Population 10 and 11 Report Validation screen, Pass/Fail summary is inconsistent with Population Scores Pass/Fail Summary.	Modified Benefits population 10 and 11 Population Scores summary to include Average days to determine Pass/Fail.
Reported Counts for Average and Median days on Benefits Population 10 and 11 Report Validation screen was an integer instead of a decimal value.	Modified Reported Counts for Average and Median Age on Benefits Population 10 and 11 Report Validation screen to be decimal value.
Benefits population 5, Group number 5.12 was not eliminated from Report Validation.	Eliminated Group Number 5.12 from Benefits population 5.
The Software is unable to submit empty samples, included in the set of submissions to NO.	Modified software to allow the submission of empty samples along with RV and DEV.
Although 9053 cells are no longer validated and the key element for validating them, First Week Affected (Field 10), is no longer used for validation, the software still treats it as "required except optional for redeterminations." This element should be optional for all records in Population 5. Because the 9053 report has been eliminated, some states will no longer capture First Week Affected.	Modified the software edit for the field First Week Affected for Benefits population 5 to optional for determination/redeterminations.
DVWS2-0-0 Tax Bug Fixes	
Problem	**Fix**
Software erroneously rejects accounts that had the combinations of liability dates < 1/1/2003, 1-7 liable quarters, and zero wages in the eight quarters before the report quarter and an activation date in the record.	Modified software to parse records that had the liability dates less than 1/1/2003, 1-7 liable quarters and zero wages in the eight quarters before the report quarter and an activation date in the record.

If any problems are encountered with the software, contact the Office of Workforce Security (OWS) Technical Support Staff (Hotline) at 1 (800) 473-0188 for assistance.

Please provide a copy of these Release Notes to all users of the software.

Data Validation (DV) State Web Software Release 2.1.0
RELEASE NOTES

Release Date: January 2009

DVWS2-0-0 Benefits Bug Fixes	
Problem	**Fix**
Software rejects records that are properly constructed as a receivable declared Uncollectible(Field 8 = U, Field 11 >0) also simultaneously meets the age and prior reporting requirements for being Removed during the Report Quarter as given in Appendix A for subpopulations 4.4 or 4.5 (Contributory), or 4.12 or 4.13 (Reimbursing).	Modified software to parse records into subpopulations 4.4 (Contributory) or 4.12(Reimbursing)when the receivable, is at least 8 quarters old at the end of Report Quarter and has been reported in the > 15 –months report cell in the two quarters preceding the RQ and is declared Uncollectible in the RQ.
