

# *Keeping It Safe*

**An Overview of the  
Safety and Health Working Team**

# Wildland Firefighting

- Inherent risk involved
- Potential for injury

*Safety is our core value.*

# Safety and Health Working Team (SHWT)

- Strives to create safe work environment
- Formed as a working team under the National Wildfire Coordinating Group (NWCG)
- Consists of the following:
  - Five Federal agency representatives
  - Three State representatives
  - Two Advisors (MTDC and NIFC)
  - NWCG Preparedness Branch Coordinator
  - An Executive Secretary

<http://www.nwcg.gov/teams/shwt/index2.htm>

*Safety is our core value.*

# Working Partnerships

- Missoula Technology & Development Center (MTDC)
- Federal Fire and Aviation Safety Team (FFAST)
- National Institute for Occupational Safety and Health (NIOSH)
- The Wildland Fire Lessons Learned Center (LLC)
- International Association of Wildland Fire
- International Association of Fire Chiefs
- National Multi-Agency Coordinating Group (NMAC)

*Safety is our core value.*

# NWCG Governance

- NWCG is undergoing dynamic organization change
  - Working Teams are being grouped into three branches
  - SHWT may be moved to the Risk Management Committee under the Preparedness Branch
  - FFAST and Medical Standards Group may be moved as subunits under SHWT
  - Budget uncertainty

*Safety is our core value.*

# Projects in Progress

- SAFENET
- Safety Alerts
- Safety Gram
- Historical Wildland Firefighter Fatality Reports
- Interagency Investigation Reports and Data
- Monitoring and Mitigating Exposure to Carbon Monoxide and Particulates at Incident Base Camps
- Sub-groups/Sub-committees
- FireFit

*Safety is our core value.*

# FireFit (FFAST Initiative)

- Trends attributed in-part to improper fitness training or lack of year-round fitness regime:
  - Injuries due to physical fitness training
  - Overuse injuries that occur early in the fire season
- Ultimate FireFit Goal:
  - FireFit was created to provide the interagency wildland fire community with a comprehensive, easy-to-follow, fitness program intended to improve firefighter safety and health and reduce injuries.

*Safety is our core value.*

# FireFit (FFAST Initiative)

- FireFit provides a basic format for a well-balanced fitness program that can be augmented as local units see fit.
- Program success will rely on management support at every level as well as individual's motivation and participation.

<http://www.nifc.gov/FireFit/index.htm>

*Safety is our core value.*

# SAFENET

- SAFENET is:
  - An anonymous reporting system where firefighters can voice safety and health concerns.
  - Documents corrective actions taken at the field level or provides suggested corrective actions for higher level of action.

*Safety is our core value.*

# SAFENET

- SAFENET is **not**:
  - A forum for personal attacks/defamation.
  - A mechanism to elevate “pet peeves.”
  - Only used for incidents that need higher level corrective action.
- Interagency criteria for posting SAFENETs:
  - Clearly stated safety or health issue encountered in wildland fire or all hazard operations.

*Safety is our core value.*

# SAFENET Management

- Three (3) Ways to Submit:
  - Electronic: <http://safenet.nifc.gov/>
  - Hard copy form: PMS 405-2, NFES 2633
  - Dedicated telephone line: 1-888-670-3938
- Agency Review:
  - Every SAFENET is reviewed by respective jurisdictional agency FFAST representative or by the National Association of State Foresters representative.

*Safety is our core value.*

# Near Miss Reporting

- National SAFENET submissions have declined since 2005:
  - 180 submissions (2005)
  - 155 submissions (2006)
  - 118 submissions (2007)
  - 143 submissions (2008)
- Every report matters. Do your part and REPORT!!!

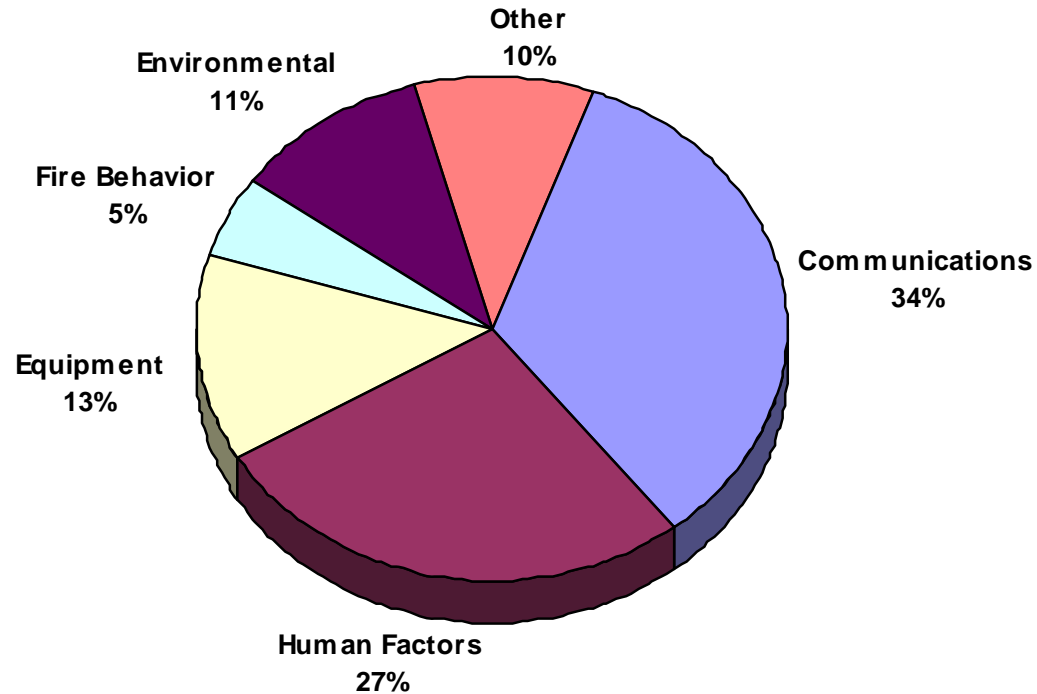

*Safety is our core value.*

# Management Level Comparison

*Safety is our core value.*

# 2008 SAFENET Contributing Factors

*Safety is our core value.*

# Safety Alerts

Twenty two (22) Safety Alerts were disseminated in 2008

<p><a href="#">Admin Login</a></p> <hr/> <p>VIEW</p> <hr/> <p><a href="#">All Notices</a> <a href="#">Safety Warnings</a> <a href="#">Safety Advisories</a> <a href="#">Safety Bulletins</a></p> <hr/> <p><a href="#">Safety Alert Home</a> <a href="#">NWCG Home</a></p> <hr/> <p><a href="#">FOIA</a> <a href="#">Accessibility</a> <a href="#">Privacy Statement</a> <a href="#">Disclaimer</a></p>	 <h2>Safety &amp; Health Working Team</h2> <hr/> <p>Welcome to the NWCG - Safety &amp; Health Working Team - Safety Alert Service. This application is a Lotus Notes Web enabled database. This database provides a way to create Safety Notifications that will be mailed to a list of subscribers. Only authorized users can create notices.</p> <p>There are three types of notices that can be created :</p> <p><b>Safety Warning:</b> A Safety Warning addresses wildland fire safety hazards that pose an imminent threat, or have potential to pose a threat, to life or property.</p> <p><b>Safety Advisory:</b> A Safety Advisory addresses wildland fire safety information that isn't related to imminent or potential threats of injury.</p> <p><b>Safety Bulletin:</b> A Safety Bulletin is a factual confirmation of a serious wildland fire accident, incident or fatality.</p> <hr/>

*Safety is our core value.*

# Safety Gram

- The Safety Gram summarizes data involving wildland and prescribed fires that resulted in entrapments, major accidents (including those with and without injuries), and fatalities for all wildland fire management organizations throughout the United States (including contractors).

<http://www.nwccg.gov/teams/shwt/safetygram2.htm>

*Safety is our core value.*

# 2008 Safety Gram

## (25 Fatalities)

- **Driving (2)**

- Two fatalities occurred while firefighters were responding to a wildland fire.

- **Entrapments/Burnovers (1)**

- One fatality occurred while firefighter was doing fire reconnaissance.

- **Medical Emergencies (3)**

- Three fatalities have occurred; one responding to a fire.
- Two heart attacks occurred while fighting fire.

*Safety is our core value.*

# 2008 Safety Gram

## (25 Fatalities)

- **Hazard Tree/Snag (1)**

- One fatality occurred; firefighter was struck by falling tree top.

- **Aviation (14)**

- One fatality occurred when an S.E.A.T. crashed.
- One fatality occurred in medical helicopter mid-air collision.
- Nine fatalities occurred when an S-61N crashed and burned.
- Three fatalities occurred when a P2V retardant plane crashed and burned on take-off.

*Safety is our core value.*

# 2008 Safety Gram

## (25 Fatalities)

- **Other (4)**

- Two individuals (VFD and Deputy Sheriff) hit by semi while directing traffic near fire.
- One fatality occurred when firefighter fell from cliff while scouting fire.
- One fatality occurred when a grader operator jumped from equipment and sustained head injuries.

*Safety is our core value.*

# Historic Wildland Firefighter Fatality Reports

- Database that tracks fatalities, entrapments and serious accidents.
- Used in trend analysis and accident prevention.
- Data collected from 1910 to 2008.
  - Since 1987 this information has been obtained from Safety Grams.

[http://www.nifc.gov/safety/historical\\_stats.htm](http://www.nifc.gov/safety/historical_stats.htm)

*Safety is our core value.*

# Interagency Reviews and Investigations Database

- 1998 TriData Phase III Study
- Managed by the Wildland Fire Lessons Learned Center (LLC)
- Provides firefighters with historical information regarding wildland firefighting accidents and reviews.
- Information can be utilized in creating:
  - Sand table exercises
  - Staff rides
  - Other lessons learned opportunities

<http://www.wildfirelessons.net/Reviews.aspx>

*Safety is our core value.*

# Missoula Technology & Development Center (MTDC)

- Partners with SHWT providing NWCG with pertinent research and studies with regard to:
  - Firefighter energy
  - Nutrition
  - Health and safety
- Produces technology and development publications

<http://www.fs.fed.us/eng/techdev/mtdc.htm>

*Safety is our core value.*

# 17 Year (1990-2006) Fatality and Entrapment Analysis

- Wildland Firefighter Fatalities in the United States 1990 – 2006 (Produced by MTDC)
  - 310 Wildland firefighters died from 1990 – 2006
  - 26% increase from initial period (1990-1998)
  - Leading causes of fatalities are: aircraft accidents; vehicle accidents and heart attacks.

[http://www.nwccg.gov/pms/pubs/pms841/pms841\\_all-72dpi.pdf](http://www.nwccg.gov/pms/pubs/pms841/pms841_all-72dpi.pdf)

*Safety is our core value.*

# Incident Emergency Medical Task Group (IEMTG)

- Emergency Medical Services Task Group (EMSG) was sunsetted January 2008
- IEMTG was created to address the coordination and delivery of emergency medical services and occupational health care on incidents.
  - New charter was approved identifying new members and new responsibilities..
  - The IEMTG website was created and resides under the NWCG's SHWT's website.

<http://www.nwcg.gov/teams/shwt/iemtg/index.html>

*Safety is our core value.*

# Hazard Tree and Tree Felling Task Group (HTTG)

- HTTG has met and established a Program of Work and Action Items with proposed timelines.
- Presented Business Plan to the SHWT on February 21, 2008, detailing planned work for the next two years.
- Provides oversight concerning strategic analysis and direction of various hazard tree and tree felling program subjects.

<http://www.nwccg.gov/teams/shwt/httf/index.html>

*Safety is our core value.*

# Wildland Fire Safety Training Annual Refresher (WFSTAR)

- Resources for refresher training instructors
  - Guidance
  - Agency policies
  - Emerging issues
  - Training materials

<http://www.nifc.gov/wfstar/index.htm>

*Safety is our core value.*

# Accident and Injury Data Collection Addition to ISUITE

- Initiated 2007 Fire Season
- Higher than expected use
- Uses ISUITE database to collect information from MEDLs and SOFRs
- Modifications have been made for '08 based on user feedback
- Information received will allow better accident and injury trend analysis by SHWT
- Need to increase use of program -excellent tool for IMTs and provides national trend data.

*Safety is our core value.*

*Questions?*
