¹ Excludes younger youth who were attending high school at exit.

² Excludes younger youth who were high school graduates or the equivalent at registration and younger youth who were still attending high school at exit.

³ This skill attainment rate, unlike the performance measure, is based only on exiters. It includes all goals set for exiters, regardless of when they were set or attained.

Note: Data for a state are shown as blank if the state did not provide data in its WIASRD submission or if the data appeared to be unreliable. For most states, the data cover the full four quarters of exiters from October 2000 to September 2001. However, for a few states employment retention and earnings change are based on a smaller number of quarters.
