Subject: In camera documents

Matt and Rich,

As you may have noticed (or in Rich's case, as you may have heard), we discovered yesterday, while Mr. Appleton was on the stand, that one of the documents that had been produced to us by Micron and subsequently included on our trial exhibit list had not been included in the in camera notice given to you a few months ago. That caused us to double-check to determine whether any others had been left off the notice. We determined last night that, as a result of clerical errors on our part, additional documents included on the trial exhibit list in the FTC proceeding had not been included on the in camera notice we provided to you. A .pdf of a printout describing those documents is attached. Some of these documents, such as the JC 42.3 patent tracking list, plainly are not confidential. Others may be. We will, however, treat each of the documents listed on the attachment as in camera pending your review. A copy of this e-mail also is being sent to Complaint Counsel so that they will be aware of the situation and so that they also will treat the documents identified on the attached list as in camera pending your review. If you would like us to bring this matter to Judge McGuire's attention, please let us know. We certainly will do so if you like.

Also, if you have any questions or concerns about this matter, please don't hesitate to contact us. My direct dial in our D.C. trial site is 202.663.6148, and the main office number here is 202.663.6158.

Thank you.

Greg Stone
