

## What is amazon.com's Karma?

This interface is nothing more than a prototype. It will be officially unveiled Nov 16 the day before Inbox in Atlanta.

Verisign Verified Domain List	Meng's Personal Whitelist	Anonymous Whitelist 5	Cloudmark Rating	ISIPP Internet Accreditation Database	AHBL RHSBL	Trusted-Forwarder.org	MailPolice Bulk
1	1	1	1	0	0	0	0

Here are the raw opinions.

```
--- #YAML:1.0
inputs:
  domain: amazon.com
opinions:
  ahbl:
    LongName: AHBL RHSBL
    Name: ahbl
    ips: []
    vote: 0
  cloudmark_rating:
    LongName: Cloudmark Rating
    Name: cloudmark_rating
    ips:
      - 127.1.100.100
    vote: 1
  isipp_iadb:
    Explanations: {}
    LongName: ISIPP Internet Accreditation Database
    Name: isipp_iadb
    ips: []
    vote: 0
  mailpolice_bulk:
    LongName: MailPolice Bulk
    Name: mailpolice_bulk
    ips: []
    vote: 0
  mungs_whitelist:
```

These opinions are available in a number of ways:

### SOAP

```
perl -MSOAP::Lite -MData::Dumper -le 'Ssoap = SOAP::Lite-
>uri("urn:/Karma")-
>proxy("http://skunks:995yhw4hw456@dumbo.pobox.com:80/karma/soap",
); my $opinions = Ssoap->opinions_flat(ARGS => { domain =>
"amazon.com" })->paramsall; print Dumper($opinions);'
```

### REST/YAML

If you query this very same URL with "Accept: text/yaml", you will get just the YAML output only.

### UDP DNS

```
% dig +short amazon.com.karma.pobox.com txt
"vdl:1"
"mungs_whitelist:1"
"isipp_iadb:0"
"whitelist_5:1"
"cloudmark_rating:1"
"trusted_forwarder:0"
% dig +short amazon.com.karma.pobox.com a
127.4.2.0
```

The A record response is "127.positive.neutral.negative". Each reputation source's vote is summed into positive, neutral, and negative.
