Endorsement

This current food inspection was conducted under FY 2008 FDA/State Contract HHSF223200740090C.

Previous inspection was conducted by GDA on 12-14-2008 Objectionable findings: No violations noted. Last FDA inspection was conducted on August 23, 2007 Objectionable findings: Uncovered product in storage area, damaged lid on re-work tank on butter line, damaged wall not easy cleanable near bulk butter fill area. Violations were corrected.

Current inspection on June 10, 2008 notes firm operates as a manufacturer of roasted peanuts and peanut butter. Official identification and inspection findings discussed with Raymond Kimbrel, Plant Manager. Objectionable findings: Steel wool pad in butter room used for cleaning not approved due to possible contamination, scraper used to work final bulk tank improperly stored above reject tank also no cleaning and sanitizing schedule for scraper, and dust build up on fan in butter fill area. All objectionable conditions were corrected during the inspection. FDA requested an evaluation of the firms metal detection procedures due to rejected product being held at the firm due to complaint of metal fragments in granule size roasted peanuts. The normal process the roasted nuts would pass under several magnets then packaged and run through a metal detector as the final process. The firm's procedure seems adequate for regular runs of product however the product in question was not checked for metal because of the metal /foil bags used in the original shipment that was rejected. The firm wishes to rework the rejected product by running it through the butter line which has a metal detector (b) (4) Model (b) (4) at the end of the process. The firm could not produce the manual for the detector so no determination could be made about the capabilities and effectiveness of the detector. No FDA samples were collected. Firm was processing peanut butter during today's inspection Firm was registered with FDA Bioterrorism. Firm was given information during today's inspection regarding the FDA Food Defense and Terrorism initiative ALERT. The inspection was conducted by Chad Beard, GDA Agriculture Sanitarian.
