

ATR: AGGREGATED DATA PROFILE

This data profile describes how the Access to Recovery (ATR) Program is meeting its objectives of expanding client choice, improving access to clinical treatment and recovery support services, and increasing substance abuse treatment capacity. Note that these data are preliminary. They represent client demographics and outcomes only for the first waves of data reported by the ATR grantees. Future program results may vary. *All data were reported by ATR grantees through the Services Accountability Improvement System (SAIS).*

Clients Served through 6/30/06

- ATR has already served **92,597** of the **125,000** clients expected to be served over 3 years.
- Sixty-eight percent (68%) of clients served are Males. Thirty-two percent (32%) are Females.
- Race distribution: about 60% of clients are White; 32% of clients are African American; 6.2% are American Indian/Alaska Natives; and approximately 1% are Asian/Pacific Islanders. In terms of ethnicity, about 11% of clients reported being Hispanic.
- The majority (54.6%) of clients served are between the ages of 25 and 44; about 26% of clients are 24 and under; 16% are between 45 and 54; about 3% of clients are over 55.

SERVICES AND VOUCHER DATA

- Over **63%** of the clients for whom status and discharge data are available have received Recovery Support Services.
- Of the vouchers issued, **56%** of the dollar amount redeemed, has been for clinical and recovery support services.
- Of these, **48%** of the dollars paid have been for Recovery Support services.
- About **24%** of the dollars paid for Recovery Support and Clinical Services have been to faith-based organizations.
- Faith-based providers account for **23%** of all Recovery Support providers and **35%** of all Clinical Treatment providers with a voucher redemption in the SAIS.

Update

63% of clients have received Recovery Support Services

48% of dollars paid have been for Recovery Support Services

24% of dollars paid have been to faith-based organizations

Faith-based organizations account for 23% of Recovery Support and 35% of Clinical Treatment providers

These figures were drawn from status/discharge interview data and voucher transaction data. SAIS: June 30, 2006.

PRELIMINARY TREATMENT OUTCOMES

Intake to Discharge Data

ATR outcome data reflect changes over time from intake to discharge from services. Through June 30, 2006, ATR grantees have collected discharge data on 42,627 clients.

These data are uploaded quarterly and the next upload to SAMHSA is October 31, 2006 covering data ending September 30, 2006.

64% were abstinent

27.4% were housed

30.1% were employed

66.9% were socially connected

81.8% were not involved with the criminal justice system

- Of those clients who reported using substances at intake into ATR, **64.0%** were abstinent from substance use at discharge.
- Of those clients who reported not having stable housing at intake to ATR, **27.4%** reported being stably housed at discharge.
- Of those clients who were unemployed at intake to ATR, **31.1%** reported being employed at discharge.
- Of those clients who reported not being socially connected at intake to ATR, **66.9%** were socially connected (attended self help groups or had someone to whom to turn in times of trouble) by discharge.
- Of those clients who were involved with the criminal justice system at intake to ATR, **81.8%** reported no involvement at discharge.
