

To: All Tikosyn® Registered Healthcare Professionals
From: Pfizer, Inc.
Date: February 1, 2008
Subject: **Tikosyn Product Outage RESOLVED**

Dear Healthcare Professional:

Pfizer is sending you this letter to inform you that all Tikosyn Dosage Formulations (0.125mg, 0.250mg & 0.500mg) are once again available to your patients through normal pharmacy distribution channels.

We apologize for any inconvenience caused by the temporary stock outage of the 0.250mg and 0.500mg dosage formulations. This product outage was not the result of any efficacy or safety concern with Tikosyn. An unforeseen manufacturing issue coupled with distribution regulations for Tikosyn (this medication is only drop-shipped and there is no inventory held in trade) resulted in the temporary stock outage. We are taking steps to increase internal inventory levels to ensure that any future manufacturing delays will not result in another product outage.

Healthcare Professionals may initiate Tikosyn therapy to appropriate new patients and should continue to direct any product information questions to **Pfizer Medical Information at 1-800-438-1985.**

Sincerely,
David J. Engels
