REASON FOR SUBMISSION OF REPORT	<input type="checkbox"/> SECTION 704D OF THE FEDERAL "FOOD, DRUG, AND COSMETIC ACT" <input type="checkbox"/> OTHER--In Cooperation with industry
---------------------------------	---

REPORT OF ANALYSIS

The above sample was examined for the presence of one or more aflatoxins.
Results of analysis were as follows:

- None found.
- No regulatory action indicated.
- Found:

- "The amount of aflatoxin detected in the above sample exceeds a level which has been designed to provide maximum consumer protection."
- "Aflatoxins are toxic and possible carcinogenic substances produced by the mold *Aspergillus Flavus*. They may present a possible danger to humans eating food containing them, including animal products which might contain toxic residues."
