Re: Docket # 2003P-0291

FDA;

I would like to encourage you to leave contact lenses as controlled devices. I have been in practice for over 25 years and learn from my patients each year a new way to mishandle contact lenses. If they are deregulated, I am concerned about the new ways patients would find to get eye infections.

Sincerely,

  
Steven F. Tronnes  
Optometric Physician
