Lester Crawford, DVM, PhD
FDA Deputy Commissioner
5600 Fishers Lane
Rockville, MD 20857

Dear Dr. Crawford,

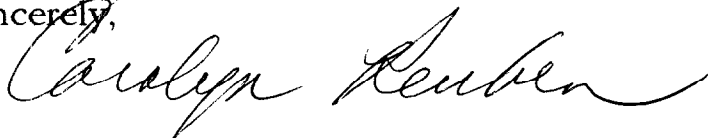

I STRONGLY protest your allowing industry to label irradiated foods as "Pasteurized" - which makes as much sense as called massage Prozacthe intended result is the same, so let's call the treatments synonyms!

Please don't mislead us, the public, by this outrageous sleight of hand!

I will not buy irradiated food, and I choose to live in the land of my birth, America, because I believe in free choice for consumers. I only have a choice, however, when I have reliable information.

Thank you for reconsidering this federal policy.

Sincerely,

Carolyn Reuben, L.Ac.
