Re: Notification of Statements on Dietary Supplement Labels

Pursuant to 21 C.F.R. § 101.93, Generation Plus Inc., the manufacturer and distributor of the Zymitol products, hereby notifies the Food and Drug Administration (FDA) that it is using the following statements on the label and in the labeling of the following Zymitol product:

PRODUCT NAME	DIETARY INGREDIENTS	STRUCTURE/FUNCTION CLAIM
Zymitol Vegetable Capsules	Methylsulfonylmethane (MSM), Protease, Bromelain, Papain, Amylase, Lipase, Serrapeptase, Alpha Lipoic Acid, Magnesium Citrate, Rutin	<p>Zymitol™ is a broad spectrum enzyme formulation with important additions like, MSM, alpha lipoic acid, magnesium and rutin. Zymitol was designed to ease the symptoms of aging while balancing your body's normal processes.*</p> <p>It's true that enzymes sustain life. Without them, we could not exist. They are catalysts for virtually every biological and chemical reaction in the body.*</p> <p>You may know that by the time we reach our late twenties, our body's own production of enzymes slows as part of the aging process. You may also know that food in its raw form is the best source of enzymes, apart from what our bodies produce. Cooked and processed foods, for the most part are absent of enzymes.*</p> <p>If your diet is comprised in large part of cooked foods, it is reasonable to assume that you may benefit from supplementation of Zymitol™.*</p>

In accordance with 21 C.F.R. § 101.93, a prominent disclaimer accompanies the above statements. The information contained in this notice is complete and accurate, and Generation Plus Inc. has substantiation that these statements are truthful and not misleading.

As required, the original and two copies of this notification are enclosed.

Sincerely,

Patrick Buehl
President
Generation Plus Inc.
