RE: VITAMIN E 400 I.U.

Dear Sir / Madam:

This is a 30-day notification of a statement of nutritional support for a dietary supplement. The product name is **Andrew Lessman's Vitamin E 400 i.u.**. The structure / function claims on all sizes and configurations of this product are identical. They are as follows:

We provide our Vitamin E in a dry, oil-free form that maximizes absorption and utilization while also maintaining potency and stability more effectively than ordinary oil-based Vitamin E, which can spoil and become rancid due to oxidation. In addition, we only use the all-natural "d" form of Vitamin E (d-alpha tocopheryl), because research has shown that it is twice as active in your body as the synthetic "dl" form. Vitamin E is essential to the functioning of all the cells in your body and its primary role is to scavenge and quench free radicals before they can cause oxidative damage. We also add another powerful antioxidant to this formula, Vitamin C, because it can recharge your Vitamin E reserves thereby extending the Anti-Oxidant\* life and benefits of the Vitamin E in your body. Vitamin E's antioxidant protection and benefits are most prominent in our cardiovascular system, where Vitamin E supports overall cardiovascular health by helping to protect the arteries and circulatory system from oxidative damage. Vitamin E has also been shown to support the health and function of the body's immune cells and system, while also offering its antioxidant support and protection to the delicate tissues of the eye and nervous system.

Respectfully Submitted,

Shawn Tiller
