

Drug Facts (continued)
Directions
Surgical Hand Antiseptic <ul style="list-style-type: none"> • For the first scrub of the day or when hands are visibly soiled, it is recommended to use an impregnated surgical scrub brush. Clean under nails with a nail pick. Nails should be maintained with a 1 millimeter free edge. • Apply to clean, dry hands and nails. Dispense a half palmful (approximately 3.0 mL) of solution in one hand. • Dip the fingers of the opposite hand into the solution and work in under the nails. • Spread the remaining solution over the hand and up to just above the elbow. • Rub thoroughly for 1 minute or until dry, paying particular attention to the nails, cuticles and interdigital spaces. • Using another half palmful (approximately 3.0 mL), repeat with the other hand. • Dispense another half palmful (approximately 3.0 mL) of solution into either hand and reapply to all aspects of both hands up the wrists. • Rub thoroughly for 1 minute or until dry. • Rinse thoroughly with water.
Healthcare Personnel Hand Antiseptic <ul style="list-style-type: none"> • Apply to clean, dry hands and nails. • Dispense a palmful (approximately 5.0 mL) into the palm of one hand. • Spread the solution evenly to cover both hands up to the wrists, paying particular attention to the nails, cuticles and interdigital spaces. • Rub hands for 30 seconds or until dry. • Rinse thoroughly with water.
Other information avoid excessive heat 40°C (104°F) • discard container when empty • suitable for use with CHG Products
