TC LETTER: 05-11

CHILD SUPPORT TRAINING COORDINATORS

SUBJECT: STATEWIDE SERVICES (SWS) VERSION 1 / IMPLEMENTATION 1 TRAINING STRATEGY

As you are aware, the CCSAS Version 1 Implementation 1 Training for Trainers is in progress. There is little time between now and when SWS goes live September 26, so many of you may have already begun planning out your approach to delivering training locally. Attached is a modified version of the SWS Version 1 Training Strategy Worksheet designed to help you as you prepare for the Implementation 1 training of your staff.

This Worksheet, which lists each of the Modules and Objectives delivered in the T4T along with the estimated timeframes related to the delivery of each objective, is a planning tool for training coordinators to identify and capture the information to assist in delivering the V1 I1 training in your agency. You are welcome to modify this tool to meet your needs.

The shaded section titled *Preparations for Local Training Delivery* suggests several things to consider in your planning:

1. Identify the LCSA Audience

It may not be necessary to train all staff. The varied assigned responsibilities may limit who needs to be trained in all of the objectives versus which objectives are pertinent for which users.

2. Number of Users

It will be important to consider, in advance, the number of people in your agency that need to be trained and how the number of people your training area can accommodate.

3. Method of Training Delivery (ILT, WBT, etc.)

The way we learn best varies from user to user so planning out how you will deliver your training will improve your chances of a successful session. As an example, Independent Learning Training (ILT) may work for those with very limited responsibilities where use of the SWS System will be necessary. This may still include the use of Web-based training (WBT).

4. Identify Delivery Schedule for Each Module & Objective

The timeframes provided in the Training Strategy Worksheet are based on the estimated time it took for trainers to deliver the T4T training and are to serve as a reference when estimating the length of time it may take you to deliver training to your staff.

5. Trainer Assignment

Determine, based on training staff available, who will train which Objectives. Depending on staff size, it may be necessary to train multiple groups and divide training staff up to train more than one group at a time.

6. Training & Logistical Needs

Consider other training and logistical needs such as whether your computer systems meet the minimum requirements and what training materials will be necessary for the trainers and trainees.

We hope this Training Strategy Worksheet is helpful. Should you have any questions, please contact Joyce Dowell, Manager of the Planning, Analysis & Program Administration Unit, Statewide Training Section, at (916) 464-2789 or by email at joyce.dowell@dcss.ca.gov.

Sincerely,
