

County Data

The following tables present county data and rates per 10,000 population. Inconsistencies in the county data are noted below:

1. Where noted by an asterisk (*), the number is an estimated total of county local program data due to incomplete or missing data.
2. Where noted by '1', Lake County local program data for FY 1990-91 are included in both Lake County and Fresno County totals for FY 1990-91.
3. Where noted by '2,' Tulare County local program data for FY 1990-91 through FY 1994-95 were reported by Fresno County.
4. Table 32 presents data about the number of persons receiving outpatient services in jail; however, these data were originally collected as unduplicated counts. The term unduplicated means that individuals are counted only once in a quarter, regardless of the number of times or types of outpatient services they receive in jail facilities. Since the involuntary detention reporting is done on a quarterly basis and this report is summarized by fiscal year, the annual counts of the number of persons receiving outpatient services in this report reflect some duplication of the same individuals counted across quarters.

Program Note

[WIC §5775 \(b\)](#) permits counties to jointly agree to deliver or subcontract for the delivery of mental health services. Sutter and Yuba counties are combined under this joint agreement and their involuntary detention data are displayed as Sutter/Yuba County.
