INVOLUNTARY DETENTION DATA - FISCAL YEAR 2001-02 (JULY 1, 2001 - JUNE 30, 2002)

California's Welfare and Institutions Code (WIC) Section 5402 requires the Department of Mental Health (DMH) to collect on a quarterly basis from each county mental health program or treatment facility quantitative information on the number of involuntary detentions, the number of temporary and permanent conservatorships established by the superior court of the county, the number of persons transferred from a jail for mental health services, the number of persons admitted to a Lanterman-Petris-Short (LPS) approved treatment program within a jail facility, and the number of outpatient mental health services provided to persons detained in jail facilities.

The following tables consist of the FY 2001-02 totals as reported by each county for each each of the various classifications of involuntary detention, including a table of state population data and a table of the rates of detention per 10,000. The population table includes data by county for children, adults, and total population. The rate of detention per 10,000 takes into account fluxuations to the annual population total and allows for comparison of these rates over time.

DATA SOURCES

The data were collected and analyzed from the quarterly reports of involuntary detentions compiled and reported from each county mental health department and the facilities that provide evaluation and treatment within each county. This includes data from all facilities, public or private, and the clients served in those facilities receiving services reimbursed by private or public funds.

Three forms are used to summarize and report the involuntary detention data to the California DMH:

1. MH 3823 - Quarterly Report On Services Provided To Persons Detained In Jail Facilities - Counties and providers use this form to summarize and report the number of transfers for admission, both voluntary and involuntary, to local inpatient services pursuant to PC §4011.6 or §4011.8 and evaluated and/or treated in a local mental health facility. It is also used to collect the number of admissions, both voluntary and involuntary, to an LPS approved inpatient treatment program within a jail facility, and the unduplicated count of persons receiving outpatient services provided within a jail facility.

2. MH 3824 - Quarterly Report Of Conservatorships Established By The Superior Court Of The County · This form is used to summarize the number of persons placed under temporary conservatorship, including the number of newly established and re-established permanent conservatorships established by the superior court of the county, regardless of the type of facility in which the patient is placed (county agency, state hospital, etc.).

3. MH 3825 - Quarterly Report On Involuntary Detentions - The MH 3825 is used to summarize the number of admissions under various categories of §5150 of the WIC. Specifically, the number of all admissions for 72-hour evaluation and treatment, the number of certifications for 14-day treatment and additional 14-day intensive treatment for persons who are suicidal, the number of certifications for 30-day intensive treatment and 180-day post-certification treatment.

DATA SOURCES continued

The reporting applies to all instances of involuntary treatment regardless of funding source. In other words, persons who are treated involuntarily in private psychiatric facilities, or whose treatment is funded by private resources, must be reported along with persons whose treatment is funded through Medi-Cal or the county mental health program. The totals also include involuntary detention data obtained from the State Hospitals.

Population projection data were obtained from the California Department of Fianance (DOF). The DOF utilized the 1990 Census counts as the benchmark for establishing the population projections for FY 2001-02.

PROGRAM NOTE

WIC §5775 (b) permits counties to jointly agree to deliver or subcontract for the delivery of mental health services. Sutter and Yuba counties are combined under this joint agreement and their involuntary detention data are displayed as Sutter/Yuba County. Population data for these two counties are combined and presented as Sutter/Yuba County.

DATA METHODOLOGY

In November 1999 the DMH introduced the Facility-Based Reporting (FBR) method to ensure more accurate involuntary detention reporting. The FBR method places the responsibility upon the county in which the treatment facility, jail, or court is located to report the number of persons admitted and detained involuntarily. For example, if client "A" is taken to county "B" under WIC §5150, then the facility in county "B" is required to report that client as one 5150 admission. County "B" should obtain these data from all appropriate facilities within their county. Next, county "B" is responsible for submitting a single report, quarterly, for each of the three involuntary detention reporting areas.

The rate per 10,000 population is an expression of the number of persons involuntarily committed when compared to a segment of the population. For example, in Table 9, for every 10,000 adults in California, 51.2 adults were involuntarily committed for 72-hour evaluation and treatment services. Each rate was calculated by dividing the number of persons in an involuntary detention classification by an appropriate population total, either adult, child, or total population and then multiplying the result by 10,000.

DATA LIMITATIONS

The DMH has learned that some counties have contracted with an outside entity, such as the local Sheriff's Office or a private medical company, to provide mental health outpatient services in jail. In many cases, the contracting agency does not report data on the services provided. Thus, the count of persons receiving mental health outpatient services in jail is limited by those counties not reporting mental health outpatient services in jail.

Additionally, the quarterly unduplicated counts of persons receiving outpatient services have been summed to represent the count of persons receiving outpatient services during the fiscal year. Unduplicated means that individuals are counted only once in a quarter, regardless of the number of times or types of outpatient services they receive in jail facilities. However, since the involuntary detention reporting is done on a quarterly basis and this report is summarized by fiscal year, the counts of persons receiving outpatient services in Table 8 reflect some duplication of the same individuals counted across quarters.

INVOLUNTARY DETENTION DATA - FISCAL YEAR 2001-02 (JULY 1, 2001 - JUNE 30, 2002)

California's Welfare and Institutions Code (WIC) Section 5402 requires the Department of Mental Health (DMH) to collect on a quarterly basis from each county mental health program or treatment facility quantitative information on the number of involuntary detentions, the number of temporary and permanent conservatorships established by the superior court of the county, the number of persons transferred from a jail for mental health services, the number of persons admitted to a Lanterman-Petris-Short (LPS) approved treatment program within a jail facility, and the number of outpatient mental health services provided to persons detained in jail facilities.

The following tables consist of the FY 2001-02 totals as reported by each county for each each of the various classifications of involuntary detention, including a table of state population data and a table of the rates of detention per 10,000. The population table includes data by county for children, adults, and total population. The rate of detention per 10,000 takes into account fluxuations to the annual population total and allows for comparison of these rates over time.

DATA SOURCES

The data were collected and analyzed from the quarterly reports of involuntary detentions compiled and reported from each county mental health department and the facilities that provide evaluation and treatment within each county. This includes data from all facilities, public or private, and the clients served in those facilities receiving services reimbursed by private or public funds.

Three forms are used to summarize and report the involuntary detention data to the California DMH:

1. MH 3823 - Quarterly Report On Services Provided To Persons Detained In Jail Facilities - Counties and providers use this form to summarize and report the number of transfers for admission, both voluntary and involuntary, to local inpatient services pursuant to PC §4011.6 or §4011.8 and evaluated and/or treated in a local mental health facility. It is also used to collect the number of admissions, both voluntary and involuntary, to an LPS approved inpatient treatment program within a jail facility, and the unduplicated count of persons receiving outpatient services provided within a jail facility.

2. MH 3824 - Quarterly Report Of Conservatorships Established By The Superior Court Of The County · This form is used to summarize the number of persons placed under temporary conservatorship, including the number of newly established and re-established permanent conservatorships established by the superior court of the county, regardless of the type of facility in which the patient is placed (county agency, state hospital, etc.).

3. MH 3825 - Quarterly Report On Involuntary Detentions - The MH 3825 is used to summarize the number of admissions under various categories of §5150 of the WIC. Specifically, the number of all admissions for 72-hour evaluation and treatment, the number of certifications for 14-day treatment and additional 14-day intensive treatment for persons who are suicidal, the number of certifications for 30-day intensive treatment and 180-day post-certification treatment.

DATA SOURCES continued

The reporting applies to all instances of involuntary treatment regardless of funding source. In other words, persons who are treated involuntarily in private psychiatric facilities, or whose treatment is funded by private resources, must be reported along with persons whose treatment is funded through Medi-Cal or the county mental health program. The totals also include involuntary detention data obtained from the State Hospitals.

Population projection data were obtained from the California Department of Fianance (DOF). The DOF utilized the 1990 Census counts as the benchmark for establishing the population projections for FY 2001-02.

PROGRAM NOTE

WIC §5775 (b) permits counties to jointly agree to deliver or subcontract for the delivery of mental health services. Sutter and Yuba counties are combined under this joint agreement and their involuntary detention data are displayed as Sutter/Yuba County. Population data for these two counties are combined and presented as Sutter/Yuba County.

DATA METHODOLOGY

In November 1999 the DMH introduced the Facility-Based Reporting (FBR) method to ensure more accurate involuntary detention reporting. The FBR method places the responsibility upon the county in which the treatment facility, jail, or court is located to report the number of persons admitted and detained involuntarily. For example, if client "A" is taken to county "B" under WIC §5150, then the facility in county "B" is required to report that client as one 5150 admission. County "B" should obtain these data from all appropriate facilities within their county. Next, county "B" is responsible for submitting a single report, quarterly, for each of the three involuntary detention reporting areas.

The rate per 10,000 population is an expression of the number of persons involuntarily committed when compared to a segment of the population. For example, in Table 9, for every 10,000 adults in California, 51.2 adults were involuntarily committed for 72-hour evaluation and treatment services. Each rate was calculated by dividing the number of persons in an involuntary detention classification by an appropriate population total, either adult, child, or total population and then multiplying the result by 10,000.

DATA LIMITATIONS

The DMH has learned that some counties have contracted with an outside entity, such as the local Sheriff's Office or a private medical company, to provide mental health outpatient services in jail. In many cases, the contracting agency does not report data on the services provided. Thus, the count of persons receiving mental health outpatient services in jail is limited by those counties not reporting mental health outpatient services in jail.

Additionally, the quarterly unduplicated counts of persons receiving outpatient services have been summed to represent the count of persons receiving outpatient services during the fiscal year. Unduplicated means that individuals are counted only once in a quarter, regardless of the number of times or types of outpatient services they receive in jail facilities. However, since the involuntary detention reporting is done on a quarterly basis and this report is summarized by fiscal year, the counts of persons receiving outpatient services in Table 8 reflect some duplication of the same individuals counted across quarters.
