

# Local Program Support

---

## WHAT'S NEW?

The DMH Community Services Division has recently re-structured to reflect our commitment to assist with individual county concerns and issues. The Local Program Support Branch includes three Sections: MHPA Plan Review and Development, MHPA Plan Review and Resources, and County Technical Assistance. These sections are responsible for MHPA plan reviews and providing technical assistance and support to county mental health programs.

In addition to offering local program support to California counties, each section specializes in a subject area or MHPA component. We hope you will find our new Local Program Support Branch helpful and convenient.

**Please email all MHPA plans and updates to:**
