

Section II—*Jurisdictional Hate Crime Statistics, 2004*

The data in this section show aggregate state totals and individual agency breakdowns of bias-motivated incidents that law enforcement agencies reported to the UCR Program. In 2004, 12,711 agencies participated in the data-gathering effort by providing 1 to 12 months of data about bias-motivated crime. Of those agencies, 2,046 (16.1 percent) reported a total of 7,649 incidents. The remaining agencies (83.9 percent) indicated that no instances of hate crimes occurred in their jurisdictions.

Table 12 shows the following data for each state: the total number of participating agencies, the population

represented, the number of agencies submitting data about hate crime incidents, and the number of incidents reported. Table 13 lists data from those agencies that reported one or more hate crime incidents. Table 14 provides a list of agencies that submitted reports indicating that no instances of hate crimes occurred.

Tables 13 and 14 present the data alphabetically by state, and each state is subdivided by agency type. Agency types include cities, universities and colleges, metropolitan counties, nonmetropolitan counties, state police agencies, other agencies, and other agencies—tribal. The data

published for universities and colleges represent crime reported only by those individual university/college law enforcement agencies that contributed to the UCR Program; the tables do not include data from educational institutions that reported hate crime data through local law enforcement agencies. Tables 13 and 14 also indicate the number of quarters for which each agency contributed hate crime data to the UCR Program. The Methodology section further explains the procedures used to collect, report, and publish data for this book.

Table 12**Agency Hate Crime Reporting by State, 2004**
