SUPPLEMENTARY INFORMATION: We are revising the format of Part 212 and eliminating subparts that merely restate the provisions of 5 U.S.C. 2102 and Civil Service Rules 1.2 and 1.3 of this chapter. The purpose of these revisions is not to make substantive changes but, rather, to make the definitions in this part consistent with the definitions found in statute and in the civil service rules of this chapter.

Regulatory Flexibility Act

I certify that these regulations will not have a significant economic impact on a substantial number of small entities (including small businesses, small

organizational units, and small governmental jurisdictions) because the regulations apply only to appointment procedures for certain employees in Federal agencies.

Airworthiness Directives; Rolls-Royce plc (RR) RB211-22B, RB211-524, and RB211-535 Series Turbofan Engines

AGENCY: Federal Aviation Administration, DOT.

ACTION: Supplemental notice of proposed rulemaking (SNPRM); reopening of comment period.

SUMMARY: This notice revises an earlier proposed airworthiness directive (AD), applicable to (RR) RB211-535E4 series turbofan engines. That proposal would have required disassembling and inspecting all the engine mounts for cracks, refurbishing the engine mounts, and replacing the front mount thrust link spherical bearing. That proposal was prompted by reports of corrosion and fatigue cracks in the mount pins, the spherical bearings, and the support links and their respective spherical bearings. This action revises the proposed rule by expanding the applicability from RB211-535E4 series turbofan engines to include RB211-22B, RB211-524, and RB211-535 series turbofan engines, and by requiring the installation of a front engine mount housing and link support assembly that has a serialized, life limited spherical bearing installed. This action also revises the proposed rule by eliminating the requirements for disassembling and inspecting all the engine mounts for cracks, and refurbishing the engine mounts. The actions specified by this proposed AD are intended to prevent failure of the front engine mount housing and link support assembly due to cracks, that could result in loss of the engine.

DATES: Comments must be received by September 29, 2003.
