This table displays the purchase rates by program for each given fiscal year. Since data are not available through the end of the most recent fiscal year, the data displayed in 2009 are as of 03/31/2009.

Purchase rates are defined as the purchase amount during the fiscal year as a percent of the active UPB at fiscal year end.

Purchase amount is defined as the total dollar amount of principal and interest purchased by the SBA on a guarantied loan in default. Purchase amounts for the 504 program also include accrued advances.

Active UPB for guarantied loans is defined as the end-of-year outstanding principal balance of loans that have not been purchased or charged off as of the end of the given fiscal year.

Purchase amounts for a given fiscal year may be adjusted if an additional amount is purchased or a repair occurs and the purchase amount is reduced.

Purchase rates for previous fiscal years are updated as purchase amounts are adjusted due to repairs and additional purchases.

Guarantied Business programs include all guarantied loans that are subject to the Credit Reform Act of 1990; which are loans SBA approved on or after 10/01/1991.

The 7(a) and 504 loans in the DELTA and STAR programs are included in the 'All Other' category, not the '7(a) Regular' and '504 Regular' categories, of guarantied business programs.
