**Commissioner Lyons' Comments on COMSECY-06-0053**

I approve the renewal of the Charter for the Advisory Committee on Reactor Safeguards (ACRS) for the normal two year period, subject to the minor editorial comment below. I believe the bases for the ACRS's Charter, as described in law and regulation, have provided and continue to provide a strong foundation for the Committee's continued service to the NRC and to this Nation. I have every expectation that with this foundation the Committee will continue to meet the challenges ahead.

On item 2.d., the current 10 CFR 1.13 (2006) includes the following sentence: "The ACRS conducts studies of reactor safety research and submits reports thereon to the U.S. Congress and the NRC as appropriate." This sentence is omitted in the draft Charter. Although language requiring such reports to Congress was struck from the Atomic Energy Act in 1998, the present language in 10 CFR 1.13 remains. The Committee should consider including this sentence in it's Charter.

 11/20/06  
Peter B. Lyons Date
