After commencement of the high-level waste repository licensing proceeding, the primary focus of the LSN Advisory Review Panel will be on broad, long-term, technical issues relating to the operation and maintenance of the LSN and continuing assessments as to how and whether LSN is performing its intended function and serving users' needs.

3. **Duration**

The LSN Advisory Review Panel is expected to operate on a continuing basis through the conclusion of the NRC proceeding on whether to grant a license to DOE to emplace waste at the repository.

4. **Official to Whom the Committee Reports**

The Panel reports to the Chief Administrative Judge, ASLBP.

5. **Agency Responsible for Providing Necessary Support**

The Nuclear Regulatory Commission will provide the necessary support through the LSN Administrator.

6. **Membership**

Membership includes representatives who wish to participate from those organizations who served on the predecessor NRC High-Level Waste Licensing Support System Advisory Committee. This includes representatives of the State of Nevada, the Department of Energy, the Nuclear Regulatory Commission, the affected units of local government in Nevada, the National Congress of American Indians, the Nevada Nuclear Waste Task Force, and a coalition of industry groups. Selected Federal agencies with substantial experience in electronic information management systems may also be included on the Panel. Consistent with the Federal Advisory Committee Act, the Secretary of the Commission may appoint additional representatives, giving particular consideration to potential parties to the HLW licensing proceeding and those who later acquire actual party status.

*and interested governmental participants?*

7. **Estimated Number and Frequency of Meetings**

The LSN Advisory Review Panel is expected to meet approximately one to two times a year and may utilize video conferencing and the computer-based capabilities of the internet.
