Total Number of Grantees with Data	153	143	133	143	143

NOTE: Some grantees are excluded from the calculations each year due to missing data. Additionally, grantees participating in Public Law 102-477 are exempted from DOL's reporting requirements and, therefore, are not included in these tables. Because the number of grantees participating in this program has risen each year, aggregate counts compared over time exaggerate the appearance of a downward trend.

¹Average wages were weighted by grantee size and exclude grantees reporting values of less than \$5.00 or more than \$50.00

²Data on total funding was provided by DOL and need not represent actual expenditures.
