

# ENVIRONMENTAL AND CULTURAL EDUCATION PROGRAM PREPARATIONS

---

Prior to your visit to Canaveral National Seashore, we ask that you carefully read over the following information to prepare you and your students for this field trip.

---

STUDENTS SHOULD WEAR (*For Lagoon/Turtle Mound Program only*):

COVERED SHOES. (no sandals or flip-flops) You will not be allowed to participate in the water part of the program if your shoes are unsuitable. The students should be wearing the shoes they are going to get wet when they get off the bus. This will speed things up.

Chaperons will be expected to participate and should also dress appropriately.

Shorts and short-sleeve shirts.

If rain is forecast you may wear rain gear.

Hats and sunscreen.

---

STUDENTS SHOULD BRING

An extra pair of shoes for after the program. (for lagoon program only)

Water bottle, insect repellent and sunscreen.

Towel and a set of dry clothes for the ride home. (for lagoon program only)

Lunch and drink. (no glass please)

## RESTROOM FACILITIES

Water and restrooms are available after the program at the Visitor Information Center.

---

## YOU SHOULD

Please view the video “We’re Expecting You” with your students. This 8-minute video will provide your students with a general overview of the National Park Service and Canaveral National Seashore’s natural and cultural resources. The last teacher to come to the park must bring the video and return it to the ranger. We only have a few videos and need to reuse them often.

Have your students complete the pre-tour worksheet and the post-test after your visit. We encourage you to send back the evaluation sheet. Your feedback and suggestions will help make these programs better for everyone.

---

## PLEASE REMEMBER

Emphasize to the students that all plants and animals in the park are protected. The dunes are fragile and are protected from foot traffic. Only seashells with no inhabitants may be taken from the seashore.

## THIS IS YOUR NATIONAL PARK!

TAKE PRIDE IN KEEPING IT LITTER FREE!
