

CHIEF PHARMACY OFFICER REPORT

JULY 6, 2006

PROMOTIONS

Results of Temporary Grade promotions for PY2006 were released on June 30, 2006. The results are posted on the Commissioned Corps Management Information System (CCMIS) website (<http://dcp.psc.gov>), click on "Services" then "Promotion Results".

The promotion success rates for PY2006 were higher than last year. Promotion to the TG-O6 rate was 40% for physicians, dentists, scientists and veterinarians and 32% for all other categories. For TG-O5 the promotion rate was 45% for all categories. For TG-O4 the rate was 100% for the medical category and 80% for all other categories. The difference in rates by category reflects an analysis of billets and current officers at TG-O6. For the pharmacy category 26 officers were promoted to TG-O6 (including 2 EPPs); 47 officers were promoted to TG-O5 (including 4 EPPs) and 67 officers were promoted to TG-O4 (including 1 EPP).

The Chief Professional Officers expect to receive an in depth briefing on the promotion cycle within the coming weeks. At that time I will have more specific information for you on the analysis of the PY06 cycle and a look ahead to next year.

TRANSFORMATION

The Transformation report from the five work groups has been reviewed by the OpDivs/Agencies and they have provided comments on the recommendations to the Secretary. The Secretary is expected to meet with OpDiv/Agency heads during the first two weeks of July to discuss the final comments.

Work has already started on recommendations that received concurrence from the OpDivs/Agencies (so that these items could be implemented as soon as possible after the Secretary issues his final decision). The Chief Professional Officers and PACs will be working on several issues including billets and career development.

On June 22nd, twelve transformation related positions were announced in the e-bulletin. Ten in OCCO and two in OCCFM. All officers interested in working on transformation should review this announcement and if appropriate, consider applying for one (or more) of these positions by July 17th. These permanent positions will be critical to assuring implementation of the major activities of transformation by 2008.

DEPLOYMENT READINESS

Corps officers meeting basic readiness is at 75.4 percent. Officers continue to be assigned to Tier 1 & 2 teams. All officers who did not respond to the OFRD survey have been assigned to Tier 3. Approximately 150 officers met for Response Training in Atlanta on June 3rd and 4th. Officers assigned to Tier 1 or 2 teams need OpDiv/Agency concurrence (per directive of the Secretary, supervisors cannot "Not Concur". This must come from the Agency head). Officers who feel they are unable to deploy due to a medical condition must submit a Deployment Waiver Request along with medical documentation to the Medical Affairs Branch.

Ten new policies related to readiness are expected out soon. These will include height and weight and physical fitness standards.
