

**Biography of
Stan Miller
Program Manager – Hybrid Vehicle Technology
International Truck and Engine Corporation**

Stan Miller leads development and demonstrates feasibility of hydraulic and electric hybrid technologies for various customer applications. He also leads the fuel economy improvement initiative for International Truck and Engine products. He holds an MBA from University of Michigan, and a BSME from Purdue University.

Miller is a member of the Society of Automotive Engineers, and he organized the Hydraulic Hybrid session for the 2007 SAE Commercial Vehicle Conference.

Miller Joined International Truck and Engine in 1999. He played a key role in the 2002-2004 engine emissions programs for big bore engines. He holds a US patent and has other patent submissions pending. Prior to joining International Truck and Engine, Miller worked for Oldsmobile division of General Motors where he was a Product Line Engineering Manager for the Intrigue and Cutlass Supreme.
