

**Bruce Dahnke, CEO
President and CEO
SkyTech Transportation**

During his professional career, Bruce Dahnke has always been at the forefront of innovation in the rail and motor freight industry. His extensive experience with intermodal logistics and his strong leadership ability enabled Bruce to found and operate Laser Express, Inc. known for providing consistent intermodal on-time service.

Bruce was actively involved with the Illinois Transportation Association, the Midwest Intermodal Trucking Association, and the National Intermodal Trucking Association while spearheading successful lobbying efforts for intermodal legislation in pursuit of improved public safety. In the year 2000, as a member of the Illinois Trucking Association's Board of Directors, Bruce's sustained teamwork resulted in the passage of Illinois legislation which identified the responsibility for the maintenance of trailers /chassis owned by railroad and steamship lines..

Bruce collaborates with the Transportation Center of Northwestern University, the University of Wisconsin, the Upper Midwest Freight Corridor Study College of Engineering, and he is an active sponsor at the Illinois Institute of Technology Department of Transportation and Logistics. He is continuously weaving strategic academic partnerships, perceived as fertile grounds likely to affect the future of transportation, in concert with the launch of SkyTech's Framework Initiative.

Bruce is an advisor to Partners for Advanced Transit and Highways (PATH), a synergistic cooperation between the University of California, the California Department of Transportation, and other public and private institutions. As a catalyst to operational and legislative changes for intermodal improvements, Bruce actively participates on the Board of Directors of the Chicago Area Transportation Intermodal Advisory Task Force.
