

2003 CAP Metadata Implementation Project
03HQAG0165
Colville Confederated Tribes
Grant Timetwa

Here is a status update of our Award No. 03HQAG0165 CAP 2003 Project. I have sent a total of 3 staff members to specialized metadata training conducted by NatureServ. We will be sending one staff member to Denver in June to attend a metadata class conducted by your office (FGDC). We are going to have a certified metadata trainer conduct a session locally sometime in June. The class size will be 10-12, so we will be sending local staff in our Natural Resource Department. We have currently spent approximately \$2,647.00 on metadata training and travel expenses associated with attending the metadata sessions. We will spend out the remainder of the travel/training dollars allocated under our award when Yvonne attends the metadata training in Denver and when we pay for the travel expenses of the metadata trainers who will come on site. We have been creating and updating the metadata documentation on existing GIS coverages that previously had no metadata. Once we provide the metadata training onsite, we anticipate that the Natural Resource employees will document
