Weight (xx.xxx) (350-355)

There is one variable in the ID Theft dataset that is not mentioned in the data dictionary. This is an additional weighting variable. It appears in columns 357 - 367 and has eight characters after the decimal point. In the final wave of interviews, questions 5 and beyond were not asked of people who indicated that they had experienced the misuse of an existing credit card, but nothing more. The additional weights adjust responses to account for this and are the weights that were used to generate the overall responses to questions from 5 on.
