

Brownfield Funding

The large majority of Brownfield funding under H.R. 1 will be awarded to individual applicants who already submitted proposals last November for Assessment, Cleanup and Revolving Loan Fund grants as part of an annual competitive grant process. These applicants are overwhelmingly individual communities with some state agencies.

The Environmental Protection Agency will name the selected grantees in April. Since it's a national competition, there is no particular "allocation" of funds for regions. It is estimated Region 5, which includes West Michigan communities, could receive \$45-55 million of the over \$180 million expected to be awarded nationally.
