Table of contents	iii
Acknowledgments	vi
Executive summary	I
Introduction	5
Tagging program fact sheets	7
1. Atlantic cod, <i>Gadus morhua</i>	9
2. Yellowtail flounder, <i>Limanda ferruginea</i>	15
3. Black sea bass, <i>Centropristis striata</i>	19
4. Atlantic shark species excluding dogfishes.....	23
5. Atlantic Striped Bass, <i>Morone saxatilis</i>	26
6. Atlantic herring, <i>Clupea harengus</i>	29
7. Atlantic Salmon, <i>Salmo salar</i>	33
8. Atlantic haddock, <i>Melanogrammus aeglefinus</i>	37
Workshop discussions	41
I. Discussion on the Northeast Regional Cod Tagging Program	43
I.1 Data collection protocol.....	43
Standardized tagging technique.....	43
Double-tagging.....	43
Spawning fish	43
Aging information.....	44
Genetic information	44
Data mapping site.....	44
I.2 Outreach.....	44
Incentives	45
High-reward tagging	45
Lottery	45
Website	45
Effectiveness of outreach.....	45
I.3 Data management and analysis.....	45
Database.....	45
Data analysis.....	46
I.4 Specific solicited feedback	46
Spatial distribution of tags.....	46
Tagging-induced mortality.....	46
Tagging into Year 3.....	46

2.	Discussion on the Yellowtail Flounder Cooperative Tagging Study.....	48
2.1	Data collection protocol	48
	Data-storage tags	48
2.2	Outreach	48
2.3	Data management and analysis.....	49
	Analytical recommendations	49
	Database recommendations.....	49
3.	Discussion on the Black Sea Bass Cooperative Tagging Project.....	50
3.1	Data collection protocol	50
	Tag selection and experimental design.....	50
3.2	Outreach	50
3.3	Data management and analysis.....	50
	Model selection	50
	Movement.....	50
	Database.....	50
4.	Discussion on the Cooperative Shark Tagging Program.....	51
4.1	Data collection protocol	51
4.2	Outreach	51
4.3	Data management and analysis.....	51
5.	Discussion on the USFWS Striped Bass Tagging Program.....	53
5.1	Data collection protocol	53
5.2	Outreach	53
5.3	Data management and analysis.....	53
	Survival and recovery parameter estimation.....	53
	High-reward tagging	53
	Fishing mortality.....	53
6.	Discussion on the Gulf of Maine Atlantic Herring Tagging Project.....	54
6.1	Data collection protocol	54
	Double-tagging.....	54
	Mortality through tagging and handling.....	54
6.2	Outreach	54
6.3	Data management and analysis.....	54
7.	Discussion on the Salmon Tagging Program	55
7.1	Data collection protocol	55
7.2	Outreach	55
7.3	Data management and analysis.....	55
	Tagger effects.....	55

8. Discussion on the Northeast Consortium Cooperative Haddock Tagging (NECCHT)	56
8.1 Data collection protocol.....	56
8.2 Outreach.....	57
8.3 Data management and analysis.....	57
9. Overarching issues.....	58
9.1 Reporting rates	58
9.2 Experimental design	58
9.3 Database design and implementation	59
9.4 Data analysis and model building.....	59
9.5 Archiving information and data access	60
9.6 General conclusion.....	60
Keynote speaker reviews	61
1. Review by Dr. Alistair Hobday	63
1.1 Overview	63
1.2 Program-specific comments and recommendations	63
Atlantic cod	63
Yellowtail flounder.....	64
Black sea bass.....	64
1.3 General comments and recommendations	64
Smart tags	66
1.4 Conclusion	66
2. Review by Dr. John Hoenig	67
2.1 Overview	67
2.2 Program-specific comments and recommendations	67
Atlantic cod	67
Yellowtail flounder.....	67
Black sea bass.....	67
2.3 General comments and recommendations	68
Annexes	71
Annex 1: Meeting Transcription	73
Annex 2: Bibliography – references on the Workshop CD, plus additional suggestions.	127
Annex 3: Workshop outline and agenda	133
Annex 4: About our Keynote Speakers.....	137
Annex 5: Attendees Contact Details.....	139

Acknowledgements

This workshop was made possible through funding provided by the National Marine Fisheries Service Northeast Regional Office (NERO) and the Cooperative Research Partners Initiative (CRPI). The concept of undertaking a tagging workshop had been discussed for some time by the Northeast Fisheries Science Center (NEFSC) as part of assessing all their mark-recapture projects.

On behalf of the NEFSC, the Gulf of Maine Research Institute would like to thank all those who attended for their constructive participation and collaboration in the production of these proceedings. Particular thanks are extended to Dr. Alistair Hobday and Dr. John Hoenig for lending their expertise to a number of diverse Northeast tagging programs.

We also acknowledge the dedication of the committee who worked together to ensure the success of this first Northeast fish mark-recapture workshop, both in the weeks leading up to the workshop and in the reviewing process of the workshop proceedings which follow. In particular, we would like to thank Dr. Paul Rago (NEFSC) for undertaking the role of Chairperson.

Organizing committee:

Chairperson	Paul Rago	Northeast Fisheries Science Center
Workshop coordinator	Togue Brawn	Gulf of Maine Research Institute
	John Hoey	Northeast Fisheries Science Center
	Steve Cadrin	Northeast Fisheries Science Center
	Laura Taylor Singer	Gulf of Maine Research Institute
	Shelly Tallack	Gulf of Maine Research Institute
