

Property Cleanup Schedule

South Minneapolis Residential Soil Contamination Site

South Minneapolis, Minnesota

April 2009

EPA's planned approach

This figure represents EPA's planned approach to the work schedule for the South Minneapolis Residential Soil Contamination Superfund Site. EPA hopes to begin cleaning up properties this summer, if funding is granted. It may take over 2 years to complete cleaning up the more than 480 properties. We plan to begin work in the northeast area and work clockwise around the site area. As we get closer to starting work a more specific schedule will be announced.

Contact Tim Prendiville for questions on the cleanup at 312-886-5122, or prendiville.timothy@epa.gov.
