#### **SUPPLEMENTARY INFORMATION:**

##### **I. Background**

The Safe Medical Devices Act of 1990 amended the Federal Food, Drug, and Cosmetic Act (the act), among other things, to add section 522 (21 U.S.C. 360l) to require PS for certain medical devices. Section 522 of the act was

further amended by FDAMA (Pub. L. 105-115). As amended, section 522 of the act revises the criteria for determining which devices are subject to PS and revises the procedures for implementing PS. The revised provisions of section 522 of the act became effective on February 19, 1998. FDA is making this guidance document available at this time in order to facilitate the initial implementation of the revised PS provisions.

This guidance document represents the agency's current thinking on criteria and approaches for PS. It does not create or confer any rights for or on any person and does not operate to bind FDA or the public. An alternative approach may be used if such approach satisfies the applicable statute, regulations, or both.

The agency has adopted good guidance practices (GGP's), which set forth the agency's policies and procedures for the development, issuance, and use of guidance documents (62 FR 8961, February 27, 1997). This guidance document is issued as a Level 1 guidance consistent with GGP's. This document is for immediate implementation to facilitate conformance with PS changes in section 522 of the act under FDAMA.
