

Re CAN-SPAM Act Rulemaking, Project NOR411008

001138

To Commissioners,

Working to control unsolicited bulk email is important. The proposed requirements to have & maintain suppression lists creates many concerns.

The cost and problems related suppression list & damage to consumers establishes the need to consider the matter most carefully.

The requirement that requires permission from the consumer prior to adding them to any list threatens many legitimate publications.

If Recf the CAN-SPAM was not designed to put these legitimate businesses out of business.

Consumers may also suffer due to the unsubscribe from a list by mistake.

I agree the need exist to address this problem. the method being considered however will greatly threaten the income of many legitimate businesses. Please be aware that the public will remember those voting to put these legitimate businesses out of business.
