US Federal Trade Commission:

I realize you are currently accepting feedback on rules to implement the CAN-SPAM Act. I strongly support any laws designed to prohibit spam and thus support the CAN-SPAM Act.

The FTC is considering implementing Suppression Lists that would require me to remove someone from any emailing that contained a product, service, or brand that the person had previously unsubscribed from.

I strongly oppose Suppression Lists as they will in no way prevent spam and will harm legitimate businesses running opt-in lists that play by the rules.

I am a partner in a company that does 1 million a year. We are dependant on this type of opt in / opt out list. I do not send spam.

Sincerely,

Rodney Brim, Ph.D.
