

Estimated total number of respondents: 2,100.

Frequency of response: On occasion.
Estimated total average burden per response: Ranges from 14 to 646; depending on type of registration activity.

Estimated total annual burden hours: 75,922 hours.

Estimated total annual costs: \$ 5,561,258.

IV. Are There Changes in the Estimates from the Last Approval?

There is a decrease of 77,052 hours (from 152,974 to 75,922) in the total estimated respondent burden compared with that identified in the ICR currently approved by OMB. This decrease reflects a decline in the number of estimated responses, and is due, in part, to EPA's enhanced ability to more accurately track registration activities via upgraded database systems. This enhancement has enabled EPA to identify and eliminate some double-counting of submitted responses. This change is an adjustment.

V. What is the Next Step in the Process for this ICR?

EPA will consider the comments received and amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval pursuant to 5 CFR 1320.12. EPA will issue another **Federal Register** notice pursuant to 5 CFR

1320.5(a)(1)(iv) to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB. If you have any questions about this ICR or the approval process, please contact the person listed under **FOR FURTHER INFORMATION CONTACT**.
