

# HEALTH CARE

Working to make health care more affordable for all Americans

## Legislative Accomplishments

Congressman Moore believes that addressing our health care needs is one of our most important domestic challenges. That's why he has supported the following efforts:

- Expanding federal support of **stem cell research** which will allow American scientists to harness this groundbreaking technology.
- Allowing the Secretary of Health and Human Services to **negotiate lower prescription drug prices** on behalf of Medicare beneficiaries.
- Reauthorizing the State Children Health Insurance Program (SCHIP) to expand access to **quality health care for children living in poverty**.

## Current Agenda

Congressman Moore is currently working on the following legislative items:

- Working with the NIH, CDC and other medical research institutions to support continued research into the **prevention and treatment of disease**.
- Improving the quality of care and protecting patient safety through the **expanded use of health information technology (HIT)**, also known as electronic medical records.
- Increasing the number of **qualified health professionals** by addressing the faculty shortage at U.S. nursing schools.
- Promoting **patient safety** through appropriate nurse staffing level requirements.

## President Obama

Congressman Moore looks forward to working with the Obama Administration to make health care more affordable for all Americans.

- Committing to **health care reform** as a moral and fiscal imperative.
- Expediting the introduction of **generic drugs**, giving consumers more options.
- Improving transparency in **Medicare Part D** plans, so that seniors understand all of their options.
