Title: IEA Progress in International Reading Literacy Study (PIRLS)

Abstract: PIRLS 2006 is a multi-national project coordinated by the International Association for the Evaluation of Educational Achievement. Approximately 46 countries will participate in this analysis of children's reading literacy and the factors association with reading acquisition. Children in grade 4 in the U.S. will be administered a reading test and the children, their teachers, and school administrators will also complete questionnaires about factors related to the development of reading literacy.

Additional Information: This is a request for emergency OMB clearance for the sampling and recruitment activities for the field test for the international surveys, Progress in International Reading Literacy Study (PIRLS) (1850-0755). Clearance is requested by November 10. The emergency clearance is necessary in order to comply with the international standard for field testing prior to full scale survey work. If this work sampling and recruitment of school participants doesn't commence in November it will delay the field test itself. This would potentially result in not being able to carry out the field test this school year. The main study itself is scheduled for next school year, 2005/2006. Because of the requirement for field testing, the potential harm is that the U.S. may not be able to participate in the study. The U.S. is one of the major participating and supporting countries involved in the international assessment activities

represented by the PIRLS. International activities like the PIRLS are mandated under the legislation authorizing the National Center for Education Statistics, the Education Sciences Reform Act of 2002, HR 3801. The field test survey and assessment activities themselves will be conducted under regular clearance for which clearance packages have also been submitted.

Title: Program for International Student Assessment (PISA).

Abstract: The Program for International Student Assessment (PISA) is a new system of international assessments that focus on 15-year-olds' capabilities in reading literacy, mathematics literacy, and science literacy. PISA 2000 was the first cycle of PISA, which will be conducted every three years, with a primary focus on one area for each cycle. PISA 2000 focuses on reading literacy; mathematics literacy will be the focus in 2003, and science literacy in 2006. In addition to assessment data, PISA provides background information on school context and student demographics to benchmark performance and inform policy.

SUPPLEMENTARY INFORMATION:

General

Under title IV, part B of the Higher Education Act of 1965, as amended (HEA), 20 U.S.C.1071, *et seq.*, most loans made to student and parent borrowers under the FFEL Program have variable interest rates.

The formulas for determining the interest on variable rate FFEL Program loans are established in section 427A of the HEA (20 U.S.C. 1077a).

The interest rates on variable-rate loans are determined annually and apply to the following 12-month period beginning July 1 and ending June 30.

As described below, interest rate caps apply to most FFEL Program loans.

FFEL interest rate formulas use the bond equivalent rate of 91-day Treasury bills auctioned at the final auction held before June 1 of each year plus a statutorily established add-on to determine the variable interest rate—

- FFEL fixed-rate Stafford loans first disbursed before October 1, 1992 that have been converted to variable-rate loans;

- All FFEL Subsidized and Unsubsidized Stafford Loans first disbursed on or after October 1, 1992;

- FFEL PLUS loans first disbursed on or after July 1, 1998; and

- FFEL Consolidation Loans for which the Consolidation Loan application was received by the lender on or after November 13, 1997 and before October 1, 1998.

The bond equivalent rate of the 91-day Treasury bills auctioned on May 24, 2004, which is used to calculate the interest rates for the one-year period beginning on July 1, 2004, is 1.066 percent, which is rounded to 1.07 percent.

For FFEL PLUS loans first disbursed before July 1, 1998, interest rates are calculated based on the weekly average of a 1-year constant maturity Treasury yield, as published by the Board of Governors of the Federal Reserve System, for the last calendar week ending on or before June 26.

The weekly average of the 1-year constant maturity Treasury yield for the last calendar week ending on or before June 26, 2004 is 2.16 percent.

Interest Rates for "Converted" Variable-Rate FFEL Stafford Loans

1. Under section 427A(i)(7) of the HEA (20 U.S.C. 1077a (i)(7)) loans that were originally made with a fixed interest rate of eight percent with an increase to ten percent four years after commencement of the repayment period were converted to a variable interest rate that may not exceed 10 percent: The interest rate for these loans for the
