Assistant Secretary, Energy Efficiency and Renewable Energy.

Decision and Order

In the Matter of: Mitsubishi Electric and Electronics USA, Inc. ("MEUS") (Case No. CAC-012).

Background

Title III of the Energy Policy and Conservation Act ("EPCA") sets forth a variety of provisions concerning energy efficiency. Part B of Title III (42 U.S.C. 6291-6309) provides for the "Energy Conservation Program for Consumer Products other than Automobiles." Part C of Title III (42 U.S.C. 6311-6317) provides for an energy efficiency program entitled "Certain Industrial Equipment," which is similar to the program in Part B, and which includes commercial air conditioning equipment, packaged boilers, water heaters, and other types of commercial equipment.

Today's notice involves residential products under Part B, and commercial equipment under Part C. Both parts specifically provide for definitions, test procedures, labeling provisions, energy conservation standards, and the authority to require information and

reports from manufacturers. With respect to test procedures, both parts generally authorize the Secretary of Energy to prescribe test procedures that are reasonably designed to produce results which reflect energy efficiency, energy use and estimated operating costs, and that are not unduly burdensome to conduct. (42 U.S.C. 6293(b)(3), 6314(a)(2))

The test procedure for residential central air conditioning and heat pump products is contained in 10 CFR Part 430, Subpart B, Appendix M. For commercial package air conditioning and heating equipment, EPCA provides that the test procedures shall be those generally accepted industry testing or rating procedures developed or recognized by the Air-Conditioning and Refrigeration Institute ("ARI") or by the American Society of Heating, Refrigerating and Air Conditioning Engineers ("ASHRAE"), as referenced in ASHRAE/IES Standard 90.1 and in effect on June 30, 1992. (42 U.S.C. 6314(a)(4)(A)) This section also provides for the Secretary of Energy to amend the test procedure for a product if the industry test procedure is amended, unless the Secretary determines that such a modified test procedure does not meet the statutory criteria. (42 U.S.C. 6314(a)(4)(B))

On December 8, 2006, DOE published a final rule adopting test procedures for commercial package air conditioning and heating equipment, effective January 8, 2007. 71 FR 71340. DOE adopted ARI Standard 210/240-2003 for commercial package air conditioning and heating equipment with capacities <65,000 Btu/h and ARI Standard 340/360-2004 for commercial package air conditioning and heating equipment with capacities ≥65,000 Btu/h and <240,000 Btu/h. *Id.* at 71371. The [MR1] capacities of MEUS's CITY MULTI VRFZ products fall in the ranges covered by ARI Standard 340/360-2004 and the DOE test procedure for residential products referred to above.

DOE's regulations contain provisions allowing a person to seek a waiver from the test procedure requirements for covered consumer products. These provisions are set forth in 10 CFR 430.27. The waiver provisions for commercial equipment are substantively identical to those for covered consumer products and are found at 10 CFR 431.401.

The waiver provisions allow the Assistant Secretary for Energy Efficiency and Renewable Energy ("Assistant Secretary") to temporarily waive test procedures for a particular basic model when a petitioner shows that the basic model contains one or more design
