DEPARTMENT OF ENERGY

Savannah River Site High-Level Waste Tank Closure

AGENCY: Department of Energy (DOE).

ACTION: Record of decision.

SUMMARY: In the Savannah River Site (SRS) High-Level Waste Tank Closure Environmental Impact Statement (Tank Closure EIS, DOE/EIS-0303) DOE considered alternatives for closure of 49 high-level radioactive waste (HLW) tanks and associated equipment such as evaporator systems, transfer pipelines, diversion boxes, and pump pits. DOE needs to close these tanks to reduce human health and safety risks at and near the HLW tanks, and to reduce the eventual introduction of contaminants into the environment. Moreover, DOE must comply with the provisions of the Wastewater Systems Operating Permit issued by the South Carolina Department of Health and Environmental Control (SCDHEC) for HLW tank operations, and with the closure schedule and provisions contained in the *Industrial Wastewater Closure Plan for F- and H-Area High-Level Waste Tank Systems* (the General Closure Plan) approved by SCDHEC. DOE evaluated three alternatives for closure of the tank systems: Stabilize Tanks, Clean and Remove Tanks, and No Action. The Stabilize Tanks alternative has three options—Fill with Grout (preferred alternative), Fill with Sand, and Fill with Saltstone.

DOE has selected the preferred alternative identified in the Final EIS, Stabilize Tanks—Fill with Grout, to guide development and implementation of closure of the high-level waste tanks and associated equipment at the SRS. Following bulk waste removal, DOE will clean the tanks if associated equipment at the SRS. Following bulk waste removal, DOE will clean the tanks if necessary to meet the performance objectives contained in the General Closure Plan and the tank-specific Closure Module, and then fill the tanks with grout.

In parallel with tank closures, DOE will evaluate and consult with SCDHEC on closure methods and regulatory compliance revisions that will allow accelerated closure and reduction of risk associated with the HLW tanks. DOE remains committed to closure of the

HLW tanks in accordance with the approved General Closure Plan.

ADDRESSES: Copies of the Tank Closure EIS and this Record of Decision may be obtained by calling a toll-free number (800-881-7292), by sending an e-mail request to nepa@srs.gov, or by mailing a request to: Andrew Grainger, National Environmental Policy Act (NEPA) Compliance Officer, Savannah River Operations Office, Department of Energy, Building 742A, Room 185, Aiken, SC 29808. This Record of Decision will be available on the Department of Energy NEPA Web site, tis.eh.doe.gov/nepa/whatsnew.htm.

FOR FURTHER INFORMATION CONTACT: Questions concerning the SRS tank closure program can be submitted by calling 800-881-7292, mailing them to Mr. Andrew Grainger at the above address, or sending them electronically to the Savannah River Operations Office e-mail address, nepa@srs.gov.

For general information on the DOE NEPA process, please contact: Carol M. Borgstrom, Director, Office of NEPA Policy and Compliance, U.S. Department of Energy, 1000 Independence Avenue, SW., Washington, DC 20585, 202-586-4600 or leave a message at 800-472-2756.

SUPPLEMENTARY INFORMATION:

Background

Nuclear materials production at the SRS resulted in the generation of large quantities of HLW that is stored onsite in large underground tanks. The HLW resulted from the dissolution of spent reactor fuel and nuclear targets to recover the valuable radioactive isotopes. DOE has stored the HLW in 51 large underground storage tanks located in the F- and H-Area Tank Farms at SRS. DOE has emptied and closed two of those tanks. Approximately 37 million gallons of HLW is stored in the remaining 49 HLW tanks.

The HLW tank systems at SRS are operated under the authority of the Atomic Energy Act of 1954 (AEA) and DOE Orders issued pursuant to the AEA. The HLW tank systems also are operated in accordance with a permit issued by SCDHEC under the authority of the South Carolina Pollution Control Act for industrial wastewater treatment facilities. DOE is required to close the tank systems in accordance with AEA requirements and South Carolina Regulation R.61-82, "Proper Closeout of Wastewater Treatment Facilities." This regulation requires that closures be carried out according to site-specific guidelines established by SCDHEC to prevent health hazards and to promote safety in and around the tank systems.
