Stephen A. Mellington Named New Nevada Site Office Manager

Stephen A. Mellington has been named the tenth manager of the National Nuclear Security Administration Nevada Site Office (NNSA/NSO). Mr. Mellington succeeds Gerald L. Talbot, Jr.

Mr. Mellington had been the NNSA/NSO Assistant Manager for Environmental Management (AMEM). In addition he serves as the Federal Technical Capability Parcel Agent responsible for ensuring the technical excellence of the NNSA/NSO federal staff.

He has served as the NNSA/NSO Deputy AMEM, Director of Environmental Restoration Division, and Chief of the Environmental Restoration Branch for the Department of Energy (DOE) Nevada Operations Office.

Mr. Mellington came to the NNSA/NSO in 1987 as an Environmental Compliance Specialist coordinating environmental compliance activities at the Nevada Test Site and serving as the National Environmental Policy Act Officer. Before joining the DOE, he worked for ten years with the Bureau of Land Management (BLM) as District Planning Coordinator and served as Project Manager for numerous Environmental Impact Statements in Nevada. His federal career began in 1977 with the BLM in Winnemucca, Nevada.

Mr. Mellington currently serves as a Director on the Nevada Wildlife Federation Board and is the current co-chairman of the Department of Interior Resource Advisory Council.

He is a graduate of the Federal Executive Institute and holds a Bachelor of Science in Soil Science from the University of Maryland.

Mr. Mellington resides in Las Vegas with his wife Suzanne and has three adult children.

As Manager he is responsible for operation and maintenance of the 1,375 square-mile Nevada Test Site and other facilities under the jurisdiction of the Nevada Site Office. The Nevada Site Office implements NNSA initiatives in stockpile stewardship and management, nuclear test readiness, crisis management, nonproliferation, environmental management and stewardship, alternate energy, and other science and technology development missions.
