## China Proposes to Ease Certification Requirements for Cosmetics Imports

### 2007

**Approved by:**

Maurice House  
U.S. Embassy

**Prepared by:**

Casey Bean and Zhang Jianping

---

**Report Highlights:**

On February 21, 2007, China notified the World Trade Organization (WTO) of a draft policy change (G/SPS/N/CHN/100) on the BSE certification for cosmetic imports from BSE-infected countries. The closing date for submitting comments is April 20, 2007, and the new SPS measure will become effective on August 1, 2007. This announcement is positive news for the U.S. cosmetics industry since they will no longer be required to submit a CTFA certificate when shipping cosmetics to China. China's demand for cosmetic imports remains strong, and the country's imports increased in January 2007 by 40 and 84 percent respectively in volume and value when compared to January 2006. Included in this report is an unofficial translation of China's WTO notification.

## Executive Summary

On February 21, 2007, China notified the World Trade Organization (WTO) of a draft policy change (G/SPS/N/CHN/100) on the BSE certification for cosmetic imports from countries infected by bovine spongiform encephalopathy (BSE). The closing date for submitting comments is April 20, 2007, and the new SPS measure will become effective on August 1, 2007.

According to the new policy, Chinese importers will no longer be requested to provide the Cosmetic Certificate for BSE issued by the health administrative department or officially authorized agencies in BSE-infected countries, including the United States, when they apply for health permits with the Ministry of Health (MOH) or declare for import inspection and quarantine with the Chinese entry-exit inspection and quarantine bureaus under the General Administration of Quality Supervision, Inspection and Quarantine (AQSIQ). MOH and AQSIQ have jointly listed forbidden high-risk materials in cosmetics from BSE-infected countries as a reference for those manufacturing countries. (Please refer to the unofficial translation of China's notification to the WTO below.)

This announcement is positive news for U.S. suppliers since they will be no longer required to submit the BSE certificate issued by the Cosmetic, Toiletry and Fragrance Association (CTFA). During 2004, in order to maintain market access for U.S. cosmetics in the wake of the December 2003 detection of BSE in the United States, FAS Beijing helped broker this interim certification requirement through CTFA.

### **China's demand for cosmetic imports remains strong—imports in January 2007 increased by 40 and 84 percent, respectively, in volume and value compared to that in the previous year**

As China's living standard and disposable incomes continue rising, so does consumer demand for cosmetic imports. China's total cosmetic imports in 2006 increased by 62 percent to 12,988 MT from 8,019 MT in 2004, and China's total import volume in the first month of 2007 increased by 40 percent compared to January 2006. China's total import value for cosmetics in 2006 reached \$276.5 million, a 94 percent increase from \$142.8 million in 2004. China's total import value in the first month in 2007 increased by 84 percent compared to January 2006. The United States is the second largest supplier to China after France, accounting for 26 and 21 percent respectively in China's total import volume and value in 2006.

FAS Beijing believes this new policy will facilitate imports of cosmetic imports.

Notification on Modifying the Management Measure For  
Cosmetic Imports From BSE-Infected Areas  
(Draft)  
(February 21, 2007)

To further strengthen the management on cosmetic imports, the measure on cosmetic imports from BSE-infected areas will be adjusted as follows.

- I. It is forbidden to import cosmetics with high-risk materials from BSE-infected areas as listed in the appendix of this notification. The Ministry of Health (MOH) and the General Administration of Quality Supervision, Inspection and Quarantine (AQSIQ) will revise and announce the list of high-risk materials based on risk assessments result.
- II. Importers will no longer be requested to provide the Cosmetics Certificate for BSE issued by the health administrative department or officially authorized agencies in BSE countries when applying for a health permit (or recorded certificate) with the health administrative department or declaring for inspection and quarantine with the entry-exit inspection and quarantine authorities, which are under the State Council.

- III. Cosmetic imports with high-risk materials listed in the Appendix from BSE-infected areas will be dealt with based on Chinese laws and regulations.

This notification will become effective on August 31, 2007

**Appendix:**

Forbidden High-Risk Materials in Cosmetic imports from BSE-infected Areas

1. Bovine and ovine brain, spinal cord, skull, vertebral column, eyes, tonsils, intestines, cerebrospinal fluid, pituitary, duramater spinalis, pineal, spleen, thymus and other lymph tissues, blood, umbilical cord, ovaries, placenta, tongue, livers, adrenal glands, pancreas, etc., as well as their products.
2. Gelatin or collagen derived from bovine or ovine bones without high pressure washing (fat skimming)—softening through acid washing—acid or alkaline treatment—filtration—sterilization with temperature at or above 138 degrees of centigrade no less than 4 seconds.
