## ACKNOWLEDGMENT

This monograph is based on papers prepared by principal investigators and other staff members from the 20 projects of the Perinatal-20 Treatment Research Demonstration Program, which was funded by the National Institute on Drug Abuse in 1989 and 1990. The purpose of this volume is to share experiences, products, procedures, and implementation strategies that have relevance for established investigators as well as clinicians involved in developing innovative services in sites not yet experienced in research.
