U.S. Total	1,114,763	49,710	1,164,473

* Coal synfuel distribution to the electric power sector and to foreign consumers is reported as a single line item at the end of the table. States with large coal synfuel capacity - Alabama, Illinois, Indiana, Kentucky, Pennsylvania, and West Virginia - will appear to have underestimated distribution.

Note: Total may not equal sum of components because of independent rounding. Data for consumer categories of electric generation, residential and commercial, transportation fuel and unknown are for coal distributed to those sectors. Data for coke plants and industrial plants are for coal receipts at the plants.
